"The Western Home Monthly" for October contains a very detailed and interesting article on the travelling health clinic that visited Raymond last August. This clinic was held at the School of Agriculture. This clinic served 480 children whose parents were financially unable to have their illness taken care of. The venture was a

complete success according to the Honorable George Hoadley, minister of health for the province. Inserts in the article before mentioned show snapshots of the Agriculture School, and of the children and parents in the temporary hospital room. Remember that the "Western Home Monthly", is the magazine given with every new or renewal subscription to the Recorder from now until November 31.

If We Had Good Roads

The old story of the man with a leaky roof, who didn't need to repair it, as long as the sun shone, and couldn't while it was raining is applicable to our hauling problems now.

We have been very fortunate this fall. The weather being in our favor and roads good, but now things are different.

Suppose we had about six gravel surfaced roads leading into the town. Many will throw up their hands, and ridicule the idea, saying, "impossible," but a district producing a million bushels of wheat and twenty thousand tons of beets is capable of building such roads.

First let us consider the actual saving, if such roads existed. One million bushels of wheat hauled an average of five miles, means about 8,000 loads of 130 bushels each. If the roads are bad, one will cut the load to 100 bushels necessitating the hauling of 2,000 more loads that will cost at least \$5,000 more not to mention time lost.

The time required to move a given amount would be increased at least twenty five per cent over road in poor condition.

One of the biggest drawbacks to beet raising is the hauling. If roads permitted the use of the truck, the cost to produce would be reduced at least twenty five per cent.

Suppose everyone's car lasted six months longer. Suppose your gas bill was reduced ten per cent. Suppose your repair bill was reduced twenty five per cent. Suppose you could get to Lethbridge or Stirling any time you cared to go, would it not be worth our united effort to start a gravel movement.

You say such a movement is impossible, but here are the facts. Our roads now are graded high enough and with some work on low places and with proper drains would be in fine shape for coat of gravel.

Would it not be profitable for the Municipality to spend \$5,000 on a gravel truck and keep it busy, then in the course of five years, we would realize our ideal.

To accomplish this the public must be convinced that it is better to have one good road than two dirt graded roads. They must realize that the road most used is the road that requires the most up keep and expense.

Let us all talk gravel, think gravel, and haul gravel on some appointed day in the future, when the fall work is finished.

It has been found necessary because of the danger of accident, to prohibit unauthorized visitors at the Raymond sugar factory. There has been a practise for several seasons of allowing visiting parties to go through the mill on Sundays, but in the future this will not be permitted. Out of town parties who find it impossible to reach the mill on any other day must secure written permission from the management, otherwise they cannot be admitted. On other days permission may be obtained at the laboratory of the factory. There have been some narrow escapes recently especially among children and young people, and for this reason permissions visiting around the plant has been stopped by officials in charge of the factory.

Don't forget the Dance Saturday night given by the Mutuals of both wards. Following this will be the big Halloween dance Wednesday night.

News Notes

The School of Agriculture will open next Tuesday, October 30. They have an enrolment of sixty students, and twenty more are expected shortly. The School has a complete staff of efficient instructors in every department, and are prepared to give pupils training that is indispensable to anyone desiring to achieve success in any agricultural occupation.

Mr. G. W. Mendenhall left last Wednesday morning for Springville, Utah by car. He was accompanied by Mrs. S. Clark, who has spent the last month here visiting with her sister, Mrs. W. D. Mendenhall.

Mr. J. D. Hall is convalescing at the Galt hospital following a serious operation. He is slowly recovering and is expected home in about ten days.

King Motors received a shipment of Ford Trucks this week.

The Circus is coming to the Capitol Friday and Saturday of next week, and it is expected to break house records.

The marriage of Mr. Harold King and Miss Venus Collett, both of Raymond was solemnized in Lethbridge, by Bishop Smith. Mrs. King and Mrs. Collett witnessed the ceremony. The young couple will make their future home in the Security Block.

We wish to draw your attention to the Halloween story appearing in the supplement this week. This story was written by Mrs. H. S. Allen and has a true setting in Cardston many years ago. The story appeared in the Desert News last year. Much praise is due her as a children's short story writer.

The local High School girls, last Friday played a softball game, in Magrath. They won with a large margin. The score being 27 to 3 in the favor of the local girls.

BORN—To Mr. and Mrs. Ross Salmon, in the Galt Hospital, a girl. Mother and daughter both doing fine. Dr. Fowler in attendance.

We strongly advocate a sane Halloween. Have your fun but property damage is not fun nor will it be tolerated. We have been advised by Town officials that offenders will be handled if caught.

Last Friday Mrs. M. H. Conquest of the Canadian Red Cross Society was a visitor in town in the interest of Red Cross work. On the program of the Junior Red Cross, addresses were given on, "Health, Citizenship and Service" to the pupils Grades V and VI. It is hoped that Junior Red Cross branches may be formed in the Raymond Schools so the pupils may receive the benefits of instruction in hygiene and civics through the excellent programs of Junior Red Cross.

Mrs. Conquest called upon Mr. and Mrs. Cope to discuss Red Cross with a view to a Raymond campaign to collect funds for the sick and crippled children in the Province at present cared for in the Red Cross Hospital at Calgary.

She also visited Mrs. Evans and explained the urgent need of financial assistance from each town in Alberta, if Red Cross work is to be continued.

In clean, bright Aluminum

The Farmer and the Research Worker

The prairie provinces of Canada have completed the harvesting and threshing of the greatest grain crops in the history of Canada, judged from the standpoint of volume. It is conservatively estimated that the wheat crop alone will not be less than 500,000,000 bushels, and that the other four principal grains, oats, rye, barley and flax, will add close to another 500,000,000 bushels to the total bringing Canada's grain yield for the first time within measurable distance of a billion bushel crop.

In almost every respect the season of 1928 was ideal from the standpoint of seeding, growing, cutting and threshing and the acreage seeded showed a substantial increase over former years. There was an absence of rust and other parasites, ample moisture, taking the country as a whole, and generally an absence of those conditions which result in a lowering of yield. The only fly in the ointment was the killing frosts of the third week in August which caught the later sown crops and those which from one cause or another had not matured. The result was disastrous from the standpoint of grades, and consequently materially lowering in prices of a large part of the total production.

According to a rough estimate of the Saskatchewan crop it is stated that about one-third of the wheat will be of the contract grades of 1, 2 and 3 northern, that another one-third will grade number 4, and that the remaining one-third will grade below that figure.

It is within the power of our farmers to partly offset the losses occasioned by dry seasons through the adoption of the most scientific methods of farming; they can increase yields and grades by using good, clean seed and by waging continuous warfare on noxious weeds; they can insure their crops against hail. But they stand helpless before the icy clutch of Jack Frost.

Addressing the annual convention of the Saskatchewan Division of the Canadian Weekly Newspapers Association, at Regina, recently, Hon. W. L. Motherwell said he knew of only one way to beat out Jack Frost, and that was to get ahead of him. He had reference to the development of wheat with earlier ripening qualities. In this connection he made mention of the valuable time gained through the development of Marquis over the old Red Fife, and brought the cheering message that as a result of the experiments this year with Garnet and Reward, there was every expectation that a further notable advance would be made. According to Mr. Motherwell, where Reward wheat was grown by farmers in all the prairie provinces, under arrangements with the Department of Agriculture, in over 90 per cent. of cases Reward was safely in stock before the August frosts. He expressed himself as quite hopeful that western farmers would yet be in a position where they could and would beat out Jack Frost.

Experiments have been conducted for some time past to determine to what extent the drying processes for damp wheat affects milling and baking qualities, and recent announcement is to the effect that, on the whole, the quality of the wheat is not seriously affected.

Now the Universities of the three prairie provinces and the Dominion Research officials are engaged in determining the effect which frost has on milling and baking qualities. Hundreds of farmers this year have had the experience of marketing wheat, weighing the full sixty pounds or more to the bushel but which, because of frost effect on the chaff, has been graded away below what would otherwise have been obtained. Rightly or wrongly there is an impression that this frost, while marring the appearance of the kernel, does not seriously affect the quality, and that the producer is sustaining a loss all out of proportion to the amount of damage done the grain, that, in a word, while the farmer-producer loses, the miller gains because he secures good milling wheat at a much less cost. The scientists are now striving to get at the real truth of the matter.

Thus are research workers for Governments and Universities working hand in hand with the farmers in endeavoring to advance the interests and prosperity of agriculture, through the development of earlier ripening grains, the elimination of rust, and in determining the actual effects of moisture and frost on the true commercial value of grain. The effort is to save hundreds of millions of dollars to the agriculturists of Canada.

Canada is spending more money than ever before in scientific research work, and the Dominion Government announces that such expenditures will be still further increased. No body of men in the Dominion stands to gain more from such work and expenditures than do the farmers of the West. The whole weight of their influence should be back of this enlightened policy.

Made Commander In Royal Naval Reserve

Canadian Awarded V.C. In Great War Receives Promotion

The promotion of Lieut. Commander Ronald Neil Stuart, V.C., D.S.O., a Canadian, now in the Royal Naval Reserve, to the rank of commander, recalls the thrilling exploit for his participation in which Commander Stuart received the highest decoration for bravery in the gift of his sovereign. Stuart was one of two Canadians awarded the Victoria

Cross while serving in the Royal Navy during the great war, the other being Lieut. R. Bourke, of Nelson, B.C.

The action for which Commander Stuart was honored was published in the London Gazette, dated Nov. 20, 1918, seventeen months after the event, and it was under provision 13 of the Royal Warrant which enables a ship's company to select members of their personnel for the distinction that the Canadian was awarded the decoration by ballot. Commander Stuart was a colleague of no less a redoubtable fighter in the war story of British hush ships than Captain Gordon Campbell, V.C., the mystery man of the "special service."

The hush ships were a product of anti-submarine campaign. They comprised colliers, freighters, merchantmen, yachts and even fishing smacks carrying concealed armaments and specially selected crews.

An Oil Without Alcohol.—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

Singing Master — Your wife's voice is greatly improved.
Husband — Yes, but not cured yet.

Public Flying Clubs

Toronto and Montreal Lead Dominion In Number Of Flying Hours

The public flying clubs of Toronto and Montreal are leading their sister clubs throughout the country in the matter of flying hours registered by their aeroplanes, according to the latest statistics available at the civil aviation branch of the department of national defence.

The Toronto planes have registered 887 flying hours, Montreal 590 hours, and Ottawa, next in line, 480 hours.

Other clubs and their records follow:

Regina, 303 hours; Edmonton, 266 hours; Victoria, 77 hours; and Calgary, 37 hours.

Touchees that Add Style to Dresses

By MAE MARTIN

It's amazing to see how easily out-of-style dresses are transformed by a few buttons, a little braid and the quick magic of home tinting or dyeing.

Your tinting or dyeing will always delight you. If you are sure to use only true, fadeless Diamond Dyes, tinting with them is easy as bluing, and dyeing takes just a little more time. New colors appear like magic right over the old colors. They give all the shades, with never a hint of that redyed look which comes from inferior dyes. Insist on Diamond Dyes and save disappointment.

"Color Craft," my big new book of dollar-saving hints, will be sent you FREE. Write Mae Martin, Diamond Dyes, Windsor, Ontario.

Allenby Is Honored

The distinguished service medal of the American Legion, highest honor that members of the former service men's organization can confer, was presented to Field-Marshal Viscount Allenby, of Great Britain, by National Commander Edward E. Spafford, at the Legion Convention at San Antonio, Texas.

WHEN YOUR BABY CATCHES A COLD

In spite of all precautions little ones will take colds—especially during the changeable days of our Fall season. When the first symptoms appear—sneezing, redness of the eyes, running nose—Baby's Own Tablets should be given at once. They will rapidly break up the cold and prevent more serious complications.

Mothers who keep a box of Baby's Own Tablets in the home always feel safe. In fact they are like having a doctor in the house. They are a gentle but thorough laxative that sweeten the stomach and regulate the bowels, thus driving out constipation and indigestion and relieving the baby of the many childhood ailments which are the direct result of a clogged condition of the bowels or sour stomach. They are absolutely safe—being guaranteed to contain no drug at all harmful to even the youngest babe. They cannot possibly do harm—they always do good.

Baby's Own Tablets are sold by all medicine dealers or will be sent by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Not a New Business

Evidence of rum-running 113 years ago has been uncovered at the customs house in Mobile, Alabama. Customs agents, searching through old federal records, found a tiny scrap of paper—evidently the last paragraph of a letter—informing federal officers of the discovery of 143 quarts, presumably liquor, submerged in a marsh.

HONORED BY NEWSPAPER ASSOCIATION

SAM. R. MOORE

Publisher of the Swift Current Sun, President of Saskatchewan Division of the Canadian Weekly Newspaper Association.

Canadian Weekly Newspaper Association

Saskatchewan Division Elects Officers At Convention Held In Regina

Sam. R. Moore, publisher of the Swift Current Sun, was the unanimous choice of the Saskatchewan division, Canadian Weekly Newspaper Association, as president for 1928-29. The election of officers was held at the closing session of the two-day convention of the organization held at the Hotel Saskatchewan, Regina. Officers elected are: Hon. S. J. Latta, honorary president; C. R. McIntosh, M.P., North Battleford, honorary vice-president; T. H. B. McCullough, the Review, Weyburn, immediate past president; Sam. R. Moore, president; H. G. Sheldrake, North Battleford, Optimist, vice-president; S. J. Dornan, the Despatch, Alameda, secretary, treasurer, and the following members of the executive, W. Ashfield, The Sun, Grenfell; B. M. Frith, The Recorder, Winkaw; R. Zubac, The Citizen, Kerrobert; W. T. Morphy, The Sun, Viscount; Andrew King, The Enterprise, Rouleau; S. N. Wynn, The Enterprise, Yorkton.

Upon the invitation of the Regina City Council and the Regina Board of Trade, Regina was decided upon as the meeting place for 1929.

Manitoba Radio Station

Largest Broadcasting Station To Be Operated In Canada

The largest radio broadcasting station in Canada is now operated by the Manitoba Telephone System.

The new broadcasting set is fully modern in every respect and compares favorably with the best stations in United States. The present station now being operated by the telephone utility was installed a few years ago, but the rapid progress in the radio industry has made it out of date.

The new set will be installed at Manitoba Agricultural College and broadcast by remote control from the Sherbrooke street telephone exchange in accordance with present practice.

Women and Asthma. Women are numbered among the sufferers from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. J. D. Kellogg's Asthma Remedy has brought new hope and life to many such. Testimonials, sent entirely without solicitation, show the enormous benefit it has wrought among women everywhere.

Hop Acreage In Canada

The total acreage in Canada of hops in bearing in 1927 was 1,037 acres, or practically double the 594 acres produced in 1926, which was quite the largest acreage up to that time. The average yield per acre was 1,375 pounds and the total yield 1,425,875 pounds, or 7,292 bales. The average price received per pound was 32 cents, making the total value of the 1927 hop crop \$456,280, as compared with \$367,246 in 1926.

The Oil Of Power.—It is not claimed for Dr. Thomas' Electric Oil that it will remedy every ill, but its uses are so various that it may be looked upon as a general pain killer. It has achieved that greatness for itself and its excellence is known to all who have tested its virtues and learned by experience.

"Hey, Miss Watsyourname!" shouted the boss. "What's the phone number of Brown & Company?"

"O," replied the new stenog, dabbling her nose, "approximately 2000 Something."

Headache? Relieve with Minard's Linctament.

Many of us are kept out of a lot of mischief by being out of funds.

ASPIRIN

Headaches may be swiftly and safely relieved by an Aspirin tablet. A most efficient remedy, and there's no after effect; its use avoids much needless suffering. Try it next time; see how soon its soothing influence is felt. Just as helpful when you have a cold; neuralgia, neuritis, rheumatism, lumbago. Just be certain you get real Aspirin—the genuine has Bayer on the box, and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to ensure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Shortage Of Butter

Canadian Production Not Keeping Up With Domestic Requirements

J. A. Caulder, President of the National Dairy Council of Canada, told the delegates to the annual meeting of the Dominion Mortgage and Investments Association, that Canada this year would be 15,000,000 or 20,000,000 pounds short of supplying her own butter requirements. The dairy industry has not kept pace with increased population, he said, and Canada had the highest per capita consumption of butter in the world—approximately 28 pounds a year.

Those who thought that mining was an underground operation will be surprised at the growing use of aeroplanes in that industry.

COUGHS

are Nature's signals warning that resistance is broken and the body undernourished.

Nail GYPROC right over Old Walls

GYPROC Advantages for Farm Buildings

Easy to use.

Low cost.

Workable as lumber.

Cannot warp, bulge,

crack, shrink or burn.

Takes any decoration.

Resists heat and cold.

Vermine proof.

Eliminates repairs.

Ideal for lining gar-

ages, poultry houses,

barns, grain bins, and

other farm buildings.

Especially suitable

for converting attics and

basements into extra

rooms.

How many rooms in your home have walls that are cracked and faded? Make them "good as new" by nailing Gyproc right over the old, unsightly wallpaper. When you've decorated with Alabastine your home will be as attractive and comfortable as any home can be.

Use Gyproc for partitioning off extra rooms, renovating attics and basements, and making grain bins, stables and other farm buildings fire-safe and vermin-proof. You can put it up yourself—easily, quickly and at a substantial saving.

Gyproc Joint Filler applied at all the joints insures a perfectly smooth, flat surface that will take any decoration.

Interesting Information Regarding Prehistoric Reptiles Discovered In Bad Lands Of Alberta

Under the auspices of the Calgary Rotary Club, Prof. Chas. M. Sternberg, of Ottawa, field paleontologist for the Canadian National Museum, addressed two audiences, recently, on the fossil remains of prehistoric reptiles discovered during recent years along the Red Deer River in the Drumheller District.

"The Dinosaurs of the Bad Lands of Alberta" was the title given to Prof. Sternberg's very interesting address and he illustrated it step by step with moving pictures, showing the careful work of excavation, and diagrams and reconstructions of the monster reptiles in their former habitat.

As a single day is to the average life of man, said the professor, so is the entire span of existence of human life on earth as compared with the time during which life in other forms has existed. Life on this planet had been divided for purposes of study, into five great periods, of which the last three periods were the reptilian, the mammalian and human.

Among the most interesting inhabitants of earth during the reptilian period of geologic time was the group known to moderns as the dinosaurs, a name which simply meant, "terrible lizards," said Prof. Sternberg. They were not a single variety, but a large group of which more than three hundred different varieties have been distinguished by scientists, and this group included the most spectacular creatures which have inhabited the globe before or since. In size they graded from one hundred feet in length, the largest creature which had ever walked on earth, to varieties measuring only a couple of feet and closely resembling some of the reptiles on earth today.

The most conservative estimate which has been put upon the period during which the dinosaurs flourished set the beginning of the reptilian age as twelve millions of years ago and the end of that period as not less than three million of years.

In Alberta, said Professor Sternberg, had been found one of the greatest deposits of fossilized remains of these creatures known to exist on earth. Thirty-five species had so far been discovered representing five different families.

Throwing a chart of the North American continent, as it had existed during the later reptilian age, on the screen, the lecturer explained why the Alberta bad lands had been a favorite habitat for the dinosaurs. The eastern and western halves of North America at that period were divided by an immense central sea which had stretched from the Arctic to the Gulf of Mexico, and from the present foothills of the Rockies to the rising lands in what are now the eastern provinces of Canada and eastern states of the American union.

The area where Calgary now stands and the Rockies themselves were then but little raised above sea level, it was explained, and from the higher land slow moving streams brought down great deposits of silt which piled up along the shores of the central sea, forming great deltas. Vegetation was semi-tropical; palms of many varieties, figs and species of trees which have since vanished, grew in profusion among the sedgy delta-lands, and these swamps were the chosen home of the great reptiles.

The disappearance of the dinosaurs was probably due to a number of causes. No great catastrophe was responsible for their extinction. The gradual rising of the mountain areas and the drying up of the central sea possibly cut off their food supply little by little, and some three millions of years ago the last of the species had given up the struggle.

The neighborhood of Drumheller

Doctor: "I have bandaged her right arm. She must not use it for a month."
Husband: "Couldn't you bandage her left also?"—Buen Humor, Madrid.

N. W. U. 1755

and Steveston along the Red Deer river was today the most fruitful hunting ground for those seeking information on the life and habits of these creatures, said Prof. Sternberg. There were probably equally rich deposits of fossils at other places along the margin of the inland sea area, but here in Alberta the Red Deer River, seeking its comparatively recent geologic times for an easier channel had cut its way through the prairie lands which had formerly been the delta-land of the central sea and had exposed great grave-yards of dinosaurs, where their bodies had been buried in the muddy swamps in which they had lived.

Rich Mineral Areas In Southern Manitoba

Prospectors Report Finding Gold, Silver, Copper and Tin

Vast areas of land, approximately 70 miles southeast of Winnipeg, are rich in mineral products including gold, silver, copper and tin, according to a statement issued by Mayor E. J. Swain, of St. Boniface, who returned to the city from a prospecting trip in Southern Manitoba.

Mayor Swain, in company with one of the oldest prospectors of Manitoba, has been investigating the southern areas for the last two years. The couple have made numerous trips to the land, which for the most part is barren and unpopulated.

The pioneer prospector, who accompanied Mayor Swain on his various trips to the southern area, is the man who assayed the first rock that came out of The Pas. He is a practical chemist and on the recent prospecting trips has done practically all of the assaying.

Demand For Shingles

Shingle mills have all the business they can handle and orders are booked up so far ahead that buyers are complaining about slow deliveries. On August 24th the Consolidated Shingle Mills of British Columbia Ltd., had orders for 741 carloads of shingles.

Sobriety In Britain

Indications Would Point To Fact That Country Is Going Dry

A striking change is taking place in the drinking habits of Britain. In 1900 the consumption of spirits in England was 32,239,522 gallons. In 1913 it was 22,004,432 gallons. Today it has fallen to 10,412,921, and is growing less.

The figures for Scotland—the home of whisky—are even more significant. The consumption of spirits in Scotland was 8,623,092 gallons in 1900, 6,709,343 in 1913, and 2,456,283 last year.

The decline in beer drinking has been equally striking. Consumption in bulk barrels, has been as follows: England, 1902, 31,810,877; 1913, 30,758,800; 1927, 23,418,640. Scotland, 1902, 2,260,750; 1913, 2,119,666; 1927, 1,673,576.

It is not surprising to learn in view of these figures that the leading brewers are contemplating a joint advertising campaign in order to implant the idea that "beer is the healthiest drink."

What is the cause of this new wave of sobriety? Students of social conditions point to new inventions, new habits, wholly new paces in the speed of life. The lure of the cinema, the lure of the wireless, have emptied the public houses. Still another time-honored custom has vanished; no longer does the business man step out for his glass of tawny port at eleven o'clock. He takes "morning coffee."

Motor cars, too, are playing their part. Time was when the sober horse ambled safely home with the tipsy driver. But the motor car does not know the road so well. Formerly one could drink before driving; today one drives before drinking. A man who has to drive home drinks less. If he drinks anything at all, after he gets home.—London Sunday Express.

Luxuries In The North

Radlos, Victrolas and Automobiles Now Seen In Northern Regions

Eskimo igloos at Akilvik, on the Arctic circle are now furnished with radios and victrolas. Mrs. John A. McDougal, wife of the governor of the Mackenzie District, of the North West Territories, reported recently when she came out to Edmonton from her home at Fort Smith, which lies 600 miles north of Edmonton. Herschel Island also has an automobile, she reports, the car having been taken up the Mackenzie River last spring. The servant problem in the north country is also a difficult one, the governor's wife remarks, for the Indians are temperamental and work only when they feel like it. This does not help the dish-washing and floor-scrubbing routine of a well-ordered governor's home. Free Press.

Fisherman (describing the catch):—The pike was so long I never saw such a fish.

Hunter—I doubt if you ever did.

"It took you a long time to pull that fellow's tooth," said the dentist's assistant.

"Yes, he married the girl I loved."

Mr. Samuel Chipman, leader of the Liberal Delegation of the British Empire Parliamentary Association which has just completed a tour of Canada, displays an intelligent interest in the largest passenger engine in the British Empire. The new Canadian Pacific 3100 was exhibited to the visiting Britishers at Windsor Station.

ROSS H. McMASTER, Director, Canadian Pacific Railway.

Ross Huntington McMaster, director of the Canadian Pacific Railway, was born in Montreal on October 11, 1880, the son of William and Lucy (Greene) McMaster; he has lived practically all his life in that city. He was educated at the Montreal High School and Collegiate Institute. His business career began with the Sherwin-Williams Co., of Montreal and Cleveland, of which he became Assistant to the Vice-President and General Manager in 1907, a post he held until 1903. In the latter year he was made assistant to the Vice-President and general manager of the Montreal Rolling Mills Company. On the formation of the Steel Company of Canada he was appointed manager at Montreal, and is now president and director.

Discover New Weeds

Two New Perennial Weeds Are Located At Saskatchewan Points

Two new weeds have been discovered in Saskatchewan and steps have been taken by the provincial department of agriculture to eradicate them before they get a hold on the land.

One is a variety of perennial rape which was found in the Grenfell district, and the other is Russian knapweed, found at Landis, Gull Lake and Tompkins.

The patches where the new weeds were discovered have been staked after the weeds were dug up and destroyed and they will be closely watched by department officials next spring to ensure that any roots that may have been missed this fall do not get a chance to grow.

Both weeds are perennials and it is thought they may have been introduced into the province through the medium of small seeds such as alfalfa.

Alberta To Exploit Tobacco

Experiments in tobacco growing by the Department of Agriculture, at Lethbridge station, have proved so successful that they will be continued, according to a statement made by Dr. J. H. Grisdale, of Ottawa, deputy minister of agriculture. It is the intention to continue the experiments, the results having been fairly satisfactory, as it is believed there is a big opportunity for that industry in Alberta.

Federal Government Willing To Aid Community Efforts In Move To Promote New Industries

Hasty Opinions Are Unjust

Much Harm Done By People Broadcasting First Impressions

Do not judge a man by your first impression, or a country by one or two natives with whom you come in contact. By so doing you may do the man or the country a rank injustice.

A Pennsylvania woman who recently returned from a visit to Canada, regaled her friends and neighbors with hours of gossip about the harshness and meanness of an official at the boundary line. To her, Canada was a good land not to live in; the Canadians were good people to leave alone; and her own United States was something that she was now more proud of than ever.

When it was pointed out to her that the official in question was an American and not a Canadian, she could say nothing except "Well! I think no more of him, no matter what he is."

But her reaction toward a friendly people had been broadcast. Many may have heard of the crude official, who will never hear her apology. Her snap judgment not only demonstrated her own ignorance, but placed blame where blame was not due. As a matter of fact, the American official was probably doing his duty properly and what seemed "gruff" to the tourist was probably merely a careful attention to duty.

Tourists are walking, talking, perpetual advertisements. The impression a country, a town, or a people make upon them, means much to the country, the town and the people—and vice versa, as well. But it is sad when "snap judgment," passes brickbats when bouquets are due. Richard S. Bond.

B.C. Plans Settlement Of British Immigrants

Local Government Now Busy Exploring Available Agricultural Lands

A proposal for the settlement of available lands in British Columbia by British immigrants will be laid before the British authorities by the local government in the near future, according to an official dispatch to the Sunday Province.

The government is busy exploring the available agricultural lands and as soon as this work is completed the local officials will be prepared to tell the British government just where these new settlers can be placed. No area will be selected until it is ascertained that it will give the settler a real opportunity to make a successful farmer. A block system of settlement is favored.

Agricultural Research

Canada To Take Part In Maintaining Work In Britain

It is announced by Dr. J. H. Grisdale, Deputy Minister of Agriculture that in response to an invitation by the Imperial Agricultural Research Conference in London, Canada, has decided to take her part in the maintenance of the three Imperial bureaux to be established for the furtherance of agricultural research, with particular attention to soil science, animal nutrition and animal health. These bureaux, which will be established in Great Britain, will cost altogether about \$100,000 per annum, the charges to be split between the member governments.

B.C. Apples For New York

Of the British Columbia apple crop now being harvested in the Okanagan Valley, it is expected that 150 carloads will go direct to New York, although the principal market will be in the Prairie Provinces of Canada. An estimate of the crop is given at 1,250,000 boxes from the Okanagan and Kootenay Districts. The apples are of excellent quality and the yield is the best in years.

Loyal To His Country

A traveller in western Ireland met an Irishman who had returned from Canada, and while talking the Irishman ascribed this country as a heaven on earth. "Why did you leave it, then?" was the natural enquiry. "Sure," was the reply, "any Irishman would leave heaven to go back to Ireland!"

Temperament is the peculiar quality that makes you think you should have your own way because you've got it.

When you look at some of the men fortune smiles on you can't blame her for smiling.

Industrial surveys are expected to be very much to the fore in Canada in the near future as a preliminary to greater development of the natural resources of the Dominion. Following the announcement of Hon. Chas. Stewart, Minister of the Interior, that his department would be glad to co-operate with Chambers of Commerce, Boards of Trade, City Councils, or other local public organizations prepared to carry on such work, there are many indications that raw materials, markets, labour, transportation and other aspects affecting development will be studied on a broad and comprehensive scale in many Canadian cities in the near future.

The extent to which the federal government is prepared to co-operate with local public bodies was recently outlined by an officer of the Department of the Interior, in a conference with the industrial executive of the Victoria Chamber of Commerce. All the resources and industrial information possessed by the Natural Resources Intelligence Service and the services of officers of the department will be available to the cities of the Dominion when they are considering plans for industrial expansion. Industrial engineers would proceed to various centres of Canada when required, and would work in co-operation with committees of the Chamber of Commerce, Board of Trade, City Council, or whatever public organization was undertaking the industrial survey.

As the result of an industrial survey carried out by the Manitoba Development Board, sixty-five new industries had been established and at Windsor the prospects are bright following a survey there. It was pointed out that the department had already been successful in assisting in the establishment of entirely new industries in Canada as a result of studies conducted in Ottawa, as in the starting up of a fish meal industry on the Pacific coast which had since been followed by many other plants. Another instance was in the manufacture of casein from skimmed milk, now carried on at a number of points in Canada, since a survey of the possibilities for manufacturing this material was conducted by the Natural Resources Service. One firm in the Fraser Valley is now producing 70,000 pounds of this material per month.

Another recent and unique instance of the effectiveness of such investigations was in the starting up of an industry in the Maritime Provinces to manufacture an insulating quilt or blanket from eel grass, a seaweed occurring abundantly along the shores of the Maritime Provinces and lower St. Lawrence. This industry will add another manufactured product to the list of imported materials replaced by Canadian ones.

The industrial survey is properly a community affair, the success of which depends primarily upon the initiative and enterprise of the local business men. No outside agency, it is contended, can bring anything like the same permanent interest and detailed knowledge to bear. The industrial survey calls for a well-organized effort of all local business interests including representatives from each type of industry already established, members conversant with transportation conditions, banking and power facilities, the housing situation, labour conditions, etc. It requires the whole-hearted support of manufacturers and merchants. In a word, to achieve success, it requires concentration of the collective business brains of the community and on top of that experience in industrial investigations. In this latter requirement the Minister of the Interior has stated that his department is solidly behind the industrial survey and is anxious that organizations which undertake such work should make free use of the experience and investigatory facilities of the Natural Resources Service.

Pafson: "You smell of brandy. Have you ever smelt brandy on me?"
Lars: "No. But I have often wondered why you have avoided me!"—Vikings, Oslo.

A Double Escape

DOCTOR'S DAUGHTER'S STORY

Another Toronto home provides evidence of how a simple cut, scratch or bruise, may pave the way to deadly blood-poison, and how vital is the need for keeping Zam-Buk, always handy?

When called upon at 3, Bushness Avenue, Mrs. J. E. Zealley, daughter of the late Dr. Bevan, of St. David's, S. Wales, said:—"My boy Alfred scratched his leg with the brass tag of a shoe lace. A nasty poisoned sore developed and it defied all the usual ointments. Hearing splendid reports about Zam-Buk I decided to give it a trial. To my great relief, the balm soon caused healing to set in. All inflammation and poisonous matter was quickly removed by Zam-Buk, and it healed the sore without leaving a scar."

"Again when I fell over a steel fender and injured my knee badly, Zam-Buk alone saved me. My daughter, a nurse, was of the opinion that only an operation could remove the mass of inflammation and pus. But I, again, pinned my faith to Zam-Buk, and it cleansed and healed the wound." All druggists and stores sell Zam-Buk at fifty cents per box. Equally valuable for eczema, pimples, cuts, burns, etc.

WORLD HAPPENINGS BRIEFLY TOLD

The demand for registered seed next year will be even greater than in previous seasons in the opinion of the Saskatchewan Registered Seed Growers' Association in Moose Jaw.

Dr. S. Parkes Cadman, chairman of the China famine relief organization in New York City, received information of the reported massacre of about 200,000 persons by fanatic Moslems in Kansu Province, China.

For the twelve months ending August 31, the Dominion Bureau of Statistics reports that alcoholic beverages valued at \$23,816,178 were exported from Canada to the United States.

More than 1,000 Saskatchewan old timers were in receipt of old age pensions under the plan approved at the last session of the provincial legislature at the end of September and there are about 2,000 more applications under investigation.

Capt. T. P. Workshop, 64, formerly Port warden of Vancouver and one of the first to operate a vessel on the upper Yukon river during Klondike gold rush, died at his home in Kamloops, B.C., after an illness of several months.

Stocks of surplus military explosives, including more than 126,000 pounds of TNT, accumulated by the government during the World War have been put to industrial uses, the United States Bureau of Mines reports.

Men would do well to copy the fair sex in the matter of scant garments, Dr. Gerald S. Webb, of Colorado Springs, told physicians conferring at the New York Academy of Medicine. Short skirts and light clothing worn by women prevent pneumonia, he said.

Up to October 8, this year, 100,439 Saskatchewan people have secured licenses for privately owned automobiles. The total number of cars licensed, not including the licenses issued to dealers, is 116,036. During the corresponding period of the previous year, the total was only 102,365.

Dr. Wilhelm Groener, minister of defence, has issued a decree ordering all officers of the reichswehr to leave any function at which the former kaiser or any of the former ruling princes are toasted. The reichswehr members are ordered to leave if any function should develop into a demonstration against the German republic.

Cloth woven by Mayans 2,000 years ago in America has been found, according to Prof. Franz Blom, of Tulane University, New Orleans.

HE DIDN'T THINK DYSENTERY COULD BE RELIEVED

Mr. John Melling, Fenner, Alta., writes:—"I am a returned soldier, and when I came home from overseas I suffered greatly with dysentery. The doctor said it was chronic and did not think it could be relieved. However, he doctored me for quite a while, but did me no good. One day the druggist asked me if I had ever tried

"On his recommendation I bought a bottle and after I had taken it got some relief, so I got two more, and have never had the dysentery since 1925."

Put up only by The T. Milburn Co., Limited, Toronto, Ont.

Value Of Tourist Traffic

No Official Figures On Amount Of Money Spent Have Been Given Out

How much money do people from the United States leave in Canada every year? No official figures have been given out, but guesses run all the way from \$100,000,000 to \$400,000,000. The Royal Bank of Canada estimates that \$275,000,000 was left by United States visitors to Canada in 1927, compared with \$140,000,000 in 1925.

This year traffic has been unusually heavy. In Quebec, which 3,430 cars from the United States entered in 1925, 425,000 cars were expected to enter this year. Ontario shows a much larger figure, but the length of stay is less.

It is estimated that 3,000,000 cars from the United States will have entered Canada before the close of the present year. Canada, seeing what is ahead, is busy spending millions of dollars for good roads.

ARE YOU AFRAID OF YOUR MEALS?

Proof That the Stomach Is Weak And Needs Toning Up

Are you one of the many sufferers who dread meal time? Hungry, and yet afraid to eat, because of the pains and discomforts that follow. When the stomach is out of order the whole system suffers, and as the blood becomes thin and watery it becomes increasingly difficult to correct the digestive disorder. There is no tonic for the stomach that is not a tonic for the whole body; thus a blood-building tonic such as Dr. Williams' Pink Pills, not only relieves indigestion, but adds to the general strength. Mr. D. J. Shaw, Selkirk Road, P.E.I., has proved the value of Dr. Williams' Pink Pills in a severe case of indigestion and relates his experience for the benefit of other sufferers. He says:—"I suffered from indigestion for a number of years. My case was so bad that words fail to describe it. My appetite was gone, constipation was present, and my nerves were all on edge. I could not sleep well at night, and the world was a dark spot for me. I tried a number of remedies, but without any benefit. Then Dr. Williams' Pink Pills were recommended, but without much faith, after so many failures, I decided to try them. After taking three boxes I noticed a change for the better. Then I got three boxes more and found I had a genuine remedy. I continued the treatment, took moderate exercise, could take plain food without suffering as formerly, and proved that these pills make good blood, and that this good blood will restore the stomach and nerves. Anyone suffering from stomach or nerve troubles will make no mistake in giving Dr. Williams' Pink Pills a fair trial."

Dr. Williams' Pink Pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont. Write today for a copy of the free booklet "What to Eat and How to Eat."

Small boy: "Say, mister, give me a pound of oysters."

Dealer: "We sell oysters by the measure, my boy, not by the pound."

Small Boy: "Well, then, give me a yard."

"The wonder metal of the age" is a fitting term for Aluminum. Its lightness, brightness, flexibility, freedom from rust, and many other good qualities, make it adaptable to a multitude of uses, a chief one being as a container par excellence for good tea—Red Rose Tea is packed only in this modern metal package.

SUNDAY SCHOOL LESSON

OCTOBER 21

CHRISTIAN STEWARDSHIP

Golden Text: "First they gave their own selves to the Lord."—2 Corinthians 8:5.

Lesson: 2 Corinthians 8:1-9, 15.

Devotional Reading: Psalm 95:1-7a.

Explanations and Comments

The Example Of Christian Generosity Given By the Churches In Macedonia, 8:1-5.—Paul calls to the mind of his readers, the Christians of Corinth, the example in generosity of the Macedonians (the churches of Philippi, Thessalonica and Berea), and ascribes the latter's large collection for the poor at Jerusalem to God, whose grace, or love, moved them to generosity. Affliction which had put their Christian character to the proof (1 Thess. 2:14), their overflowing joy (1 Thess. 1:6), and their dire poverty, had resulted in spiritual riches, great liberality. For they gave willingly as they were able, and indeed more than they were able, as he, Paul, could testify. Perhaps Paul at first thought the Macedonians too poor themselves to share in this collection, for he now says that they begged the privilege of joining in this grace and fellowship "The contribution of the Macedonian Christians was really comparable to the giving of the widow's mite."

"Strange to say, it is not those to whom the gospel comes easily, and on whom it imposes little, who are most generous in its cause. On the contrary, it is those who have suffered for it, those who have lost by it, who are as a rule most open-handed. Comfort makes men selfish, even though they are Christian; but if they are Christian, affliction, even to the spoiling of their goods, teaches them generosity."—James Denney.

The collection was to minister to "the saints" (Paul's term for Christ's followers) at Jerusalem. There were several reasons for their poverty. "The religious prejudices of the Jews, amongst whom they lived, entailed upon them constant social persecution, even in times of comparative peace; the claims of Christian visitors upon their hospitality were heavy; the maintenance of the apostles and of a disproportionate number of Christian teachers threw on them an undue share of Christian burdens. But whatever the causes of their poverty, it was certainly chronic."

Paul explained to the Corinthians the method of the Macedonians; they first gave themselves to the Lord. And it was their devotion to Paul as well as to the Lord which led them to further his work in the matter of the collection. What Paul says is virtually this: "We expected little from people so poor, but by God's will they literally put themselves at the service of the Lord, in the first instance, and of us as his administrators. They said to us, to our amazement and joy, 'We are Christ's and yours after him, to command in this manner.'"

Winnipeg Newspaper Union

A Frock Of Distinction

Decidedly smart is the frock pictured here. The pointed bodice is joined to the skirt having plaits at front and a slightly flared back, a shaped collar, and long sleeves gathered to deep cuffs. No. 1576 is in sizes 34, 36, 38, 40 and 42 inches bust. Size 36 requires 3½ yards 39-inch or 2½ yards 54-inch material, and ¾ yard 39-inch contrasting for View "B." Price 20 cents the pattern.

Every woman's desire is to achieve that smart different appearance which draws favorable comment from the observing public. The designs illustrated in our new Fashion Book are originated in the heart of the style centers and will help you to acquire that much desired air of individuality. Price of the book 10 cents the copy.

Has Visited Many Countries

The Prince of Wales must by this time be one of the most widely travelled young men of his age. When he returns in January he will have officially visited 27 countries — Canada, Australia, India, South Africa, New Zealand, Malta, Gold Coast, British East Africa, Kenya, Tanganyika, Rhodesia, Nigeria, Basutoland, Sierra Leone, Malaya, West Indies, United States, Argentina, Chili, Egypt, Spain, France, Belgium, Uruguay, Central America, China, and Japan.

ALBERTA WHEAT POOL NEW TERMINAL ELEVATOR

That the Alberta Wheat Pool is anticipating in future years the great bulk of Alberta's crop will seek the world's markets by way of Pacific tidewater is evident from that organization's activities in building and acquiring terminal elevator space at Vancouver and Prince Rupert.

Just recently a great new terminal has been completed for the Alberta Pool, at Vancouver, by the Northern Construction Company and J. W. Stewart, and with C. D. Howe & Company, recognized as one of the foremost designers of terminal elevators, as the engineers. The capacity of this new terminal is approximately 2½ million bushels which brings the total storage controlled by the Alberta Pool on the Pacific coast up to 5,300,000 bushels.

The new Alberta Pool terminal is located adjacent to the Second Narrows Bridge on the city side of Vancouver Harbor. There its workhouse towers 200 feet into the air. Flanked with huge bins 123 feet high, as material testimony to the foresight of the Alberta Pool farmers.

When the Pool organization started its venture into the elevator business in 1925, it at once laid plans for the securing of an elevator site at Vancouver whereupon to build a terminal which would be operated in conjunction with the line elevator system to be developed throughout Alberta. At the present time the Alberta Pool has over 300 country elevators scattered through the length and breadth of the province and controls two terminals at the coast besides

the one just built. At Prince Rupert the Pool has under lease Canadian Government terminal elevator with a capacity of 1,250,000 bushels. At Vancouver another government terminal with a capacity of 1,640,000 bushels is also under lease. The combination of line and terminal elevators provide a well balanced elevator system which is greatly in favor with the Pool membership of the Province of Alberta.

The Alberta Pool elevator system works on a patronage basis, that is, excess earnings are distributed to the pool farmers who ship through pool elevators, or direct their loaded cars to pool terminals. Approximately one million dollars excess earnings from the elevator operations during the 1927-28 crop year were returned direct to Alberta Pool elevator patrons.

For COLDS of All the Family

This Modern External Treatment is best

Mothers prefer the external treatment, Vicks VapoRub, for children's colds, because it avoids the constant "dosing" so disturbing to delicate little stomachs. You just rub it on the throat and chest at bedtime.

Other members of the family prefer Vicks for their own colds, because it is convenient, and quick in bringing relief.

For free sample, write Vicks Chemical Co., No. 1 Lee St., Greensboro, North Carolina, U.S.A.

VICKS VAPORUB

Acts 2 Ways at Once

Recipes For This Week

(By Betty Barclay)

LAMB SOUFFLE

- 1 cup soft bread crumbs.
- 2 cups thick white sauce.
- 2 eggs.
- 1 teaspoon chopped parsley.
- 2 cups chopped lamb.
- ½ tablespoon salt.
- ¼ teaspoon pepper.
- 1 teaspoon onion.

Make and cool white sauce, then mix it with crumbs, seasoning, and chopped meat. Add the beaten yolks of eggs, then fold in the stiffly beaten whites. Put into a well-buttered baking dish and set in a hollow pan containing one inch of boiling water. Bake twenty to twenty-five minutes in a moderate oven. Serve at once.

LEMON JUNKET IN PRUNE WHIP

- 1 packet lemon junket.
- 1½ cups stewed prunes.
- 1 pint milk.
- White 1 egg.
- Sugar.

Put the stewed prunes through a coarse sieve into a large bowl; sweeten to taste. Add the white of egg and beat with wire whisk 10 minutes. Fill tall dessert glasses half full. Dissolve the junket powder in the slightly warmed milk and pour carefully into glasses, holding a spoon flat over the whip to catch the milk as it is poured in. This careful pouring will keep the whip from floating. Let set in warm room until firm. Grate a little nutmeg over top. Chill.

Demand For Registered Seed

The demand for registered seed next year will be even greater than in previous seasons in the opinion of the officials of the Saskatchewan Registered Seed Growers' Association in Moose Jaw.

Knew He Was Safe

"I think we should tak' a walk doon the toon and see the shops, lassie," said an Aberdonian to his wife. "But they're a' shut," she replied. "D'ye think I didna ken that?" he said. "I'm no' daft a' th' gither."

"You're doing well, young fellow," said the shipping clerk encouragingly, "the foreman praises you to the skies." "I'd sooner he'd praise me to the hoss," was the quiet reply.

We understand that there is a Scotsman in Greenland who keeps his thermometer in the house so it won't freeze.

Scotchmen are said to be untidy, but they like their whisky neat.

Artificial Clouds a Success

German Invention Makes Country Entirely Invisible From Air

Experiments in making cloud screens capable of hiding an entire country side from airplanes have been concluded near Stuttgart, and the results were pronounced highly satisfactory.

Flame throwers of the same type employed during the war were used for distributing gas which, upon striking the air, becomes heavy and opaque. The purpose of the test was to determine if an entire industrial section could be made invisible to hostile airplanes. The flame throwers were mounted on the ground on all sides of the area around which it is desired to lay a screen. Thus the section could be hidden regardless of the direction of the wind.

Planes flew over the region after the cloud was laid and observers declared they were unable to detect a single building through the gas cloud. Photographers returned with plates which proved worthless as far as identification was concerned. The composition of the cloud forming gas was kept secret.

Might Be Good Advice

Rockefeller's Idea Of How To Get On In World

From New York comes a new story concerning John D. Rockefeller, the multi-millionaire.

A young man asked his advice as to how best to get on in the world.

"Work hard and set yourself to buy a gold watch," was the reply.

"Yes," queried the listener, "and when you've bought the gold watch?"

"You don't buy a gold watch," replied Mr. Rockefeller, "you buy a gun-metal one and start all over again for a motor car."

"And when you've got the money for a motor car?"

"Well, you remember the watch, if you're not a fool, and go on walking to business."

Animals

Minard's heals bruises, sores, sprains, saddle boils, distemper, etc.

Women voters outnumber men in four constituencies in England, and in two of these, Cbeatenham and one Glasgow division, the present M.P.'s are bachelors.

Cuticura Baths Comfort And Refresh The Skin

Cleanse and freshen your skin by bathing daily with Cuticura Soap. If there are any signs of pimples, redness or roughness, follow with a gentle application of Cuticura Ointment to soothe and heal. Cuticura Talcum, smooth, cooling and fragrant, is the ideal toilet powder.

International Oratorical Contest Is Won By Representative of France

Washington, D.C.—Canada's cup, emblematic of supremacy in the 1928 international oratorical contest, goes to France as a result of the award of five judges in Washington recently, of the highest place to Rene Pontthieu, of Paris.

American countries captured all other honors in the field of eight contestants, Jose de Tomasco, Argentina, was second; William Fox, Jr., of London, Ont., was third; and John Moore, Kentucky, U.S.A., was fourth. The occasion, and the great crowd.

The auditorium was crammed for sang "O Canada!" lustily to greet Fox as he arose to speak on Canada's future. The result of the first ballot was a tie between Canada, France and Argentina. Each had an equal number of points. The judges, four professors from American universities, and one from the Paris school of psychology, retired to consider points further, and finally submitted a second set of ballots which gave first to France, second to Argentina and third to Canada.

De Tomasco took for his topic the confraternity of the Americas. The greatness of the United States imposed certain duties on her principally in South America, he said. Some Latin-American countries had not kept pace with the quick strides of the United States, which should lend to her weaker neighbors a helping hand. "Do not do this if it requires more of the rifles of your soldiers than of the good-will of your civilization," he said.

In the Argentine, the situation in Nicaragua had "provoked an evident uneasiness, a moral anxiety, and had given rise to unfavorable interpretations," de Tomasco said. Argentines had a great admiration and affection for the United States, and believed the North American countries would some day be united in friendship with the Latin-American countries in a great federation of all American countries dedicated to peace and progress.

Imperial association is Canada's only rational and possible choice of three possible political courses in the future, said Mr. Fox, Canada's representative. He dismissed two other alternatives in a word. Annexation with the United States, he said, would cut the Dominion adrift from past tradition and legitimate heirship to a share in the glories of the empire. Complete independence would mean the withdrawal of the strength and prestige of Great Britain.

Gives Reasons For The Establishment Of Canadian Legations

London.—Premier Mackenzie King, addressing the Canada Club here, made the following statement, explanatory of the motives which prompted the establishment of Canadian legations at Washington and Paris:

"It is a desire to gain the advantage in international negotiation of diplomatic standing and status for whoever today may be representing Canada's interests in the United States and France, and for whoever may succeed to that high responsibility in the years to come.

"Next it is to provide means of more effective consultation and co-operation between the British and Canadian government on matters in the United States and in France which are to us of common interest and concern.

"But over and above all else is the hope we devoutly cherish that a Canadian legation in the United States and in France may serve increasingly as a reminder of the near relationship our country bears to these great countries and to this old land.

"In the United States our legation, we trust will stand as a symbol of Anglo-Saxon friendship and goodwill based upon kindred ties of blood and tongue and tradition between the British and American peoples. And our legation in France will stand as a symbol of that union of French and British minds and hearts which has helped to make Canada what she is, and a never-ending friendship between these two great races.

"Alike in the old world and in the

Mr. Fox, who took for his theme "Canada's Future," devoted the first part of his ten-minute speech to a review of Canada's resources and commercial developments.

Explorer Starts Long Trek

Commander Byrd Expects To Reach New Zealand November 5

San Pedro, Calif. — Commander Richard E. Byrd has started his long trek into the unexplored Antarctic regions and out on the Pacific well on his way to New Zealand, where he will make his first stop about November 5.

Commander Byrd and his party sailed from San Pedro on the whaler C. A. Larsen, with the shrieks of whistles, the boom of guns and the cheers of thousands of persons wishing them Godspeed on their long and dangerous journey.

Conditions Are Improving

Department Of Labor Reports Fewer People Unemployed

Ottawa, Ont.—Material improvement in employment conditions throughout Canada during the current year is revealed in figures dealing with employment placements released by the department of labor. Up to the end of August, employment was found for 285,714 applicants at the various public employment offices in the Dominion. In the first eight months of last year work was found for 239,570 applicants.

Many Men Idle At Coast

Victoria, B.C.—Stating that as the annual layoff of workers engaged in seasonal industries had already commenced at the Pacific Coast and that there were now close to 30,000 workers out of employment, Hon. W. A. McKenzie, minister of mines, advised the men looking for work to stay away from British Columbia unless he had sufficient funds to last him till he gained employment.

Robbery Motive Suspected

Saskatoon.—Belief that Mike Harrison, whose body was found on blood-soaked newspapers beside the C.N.R. tracks near Saskatoon, was the victim of foul play, was strengthened when it was discovered he had received \$195 pay from a farmer a few days before his death. There was only 15 cents in his pocket when he was found dead, his skull badly smashed, and wounds on his back.

new, it is permanent friendship and goodwill which above all else Canada seeks for herself in relation to the countries, and between these countries and the great community of the British nations to which she is so proud to belong. We are not without hope that our voice at Washington and Paris may be helpful towards that great end.

HAS SETTLEMENT PLAN

Lord Melchett, formerly Sir Alfred Mond, who is in Canada. He proposes land grants to settlers by the Dominion and the financing of the undertaking by Great Britain as a solution to the British unemployment problem.

'Plane Crashes In Hudson Bay Area

Machine Forced To Land and One Man Reported Killed

Toronto.—A special despatch to the Toronto Star from The Pas, Man., says that one member of an aerial exploration party is dead, and another badly frozen as a result of a plane crash in a forced landing in the Hudson Bay area.

The Star's despatch follows: "One member of the Northern Aerial Mineral Exploring prospecting party is dead and another prospector is badly frozen and is in a critical condition according to word reaching The Pas. The men were in the Hudson's Bay area seeking minerals and are believed to be members of a party being transported by airplane to a new field, or what is known as the North Plane. The plane, forced to land, it is understood crashed on a reef.

"Word of the precarious position of the men on the plane was radioed to a Dominion government tug operating in the Hudson's Bay District. It at once rushed to the scene of the wreck and was able to rescue six of the men on the plane. The name of the pilot in charge has not yet been learned.

"As soon as word of the fatality reached here Captain Oakes was sent out by plane to render all help possible."

China Inaugurates President

Shanghai, China.—General Chiang Kai Shek has been inaugurated president of China. For the first time in 17 years of her history as a republic, China thus attained a unified central government. This was a national holiday. Chiang was installed at Nanking, the Nationalist capital, with impressive ceremony, amid general rejoicing. He was made chairman of the Nationalist government council with the title of president.

Floods Hasten Relief Work

West Palm Beach, Fla.—Rehabilitation tasks in the hurricane devastated area about Lake Okechobee have been set back by hampered by flood waters. The lake and surrounding streams and rivers were out of their banks after heavy rains. Thousands of acres of farm land were under water.

Unemployment Insurance

Question To Come Up For Consideration When Ottawa House Meets

Ottawa, Ont.—Unemployment insurance, which was the subject of investigation by the industrial committee of the House of Commons last session, will be given further consideration when parliament convenes again. This assurance was given by Hon. Peter Heenan, Minister of Labor, who stated that the majority of the provinces of the Dominion already had declared themselves upon the proposal.

In its report the industrial relations committee accepted and endorsed the principle of unemployment insurance, based on compulsory contributions derived from the state, the employer and the employee. The report further pointed out that the responsibility for such legislation primarily rested with the provincial governments.

On the basis of the committee's findings the department of labor communicated with the various provinces to ascertain which of them would be prepared to consider adopting the proposal and to what extent they were willing to go at the present time. Mr. Heenan intimated that these replies would be submitted to parliament at the next session. The minister refused to divulge the views of the provinces in the matter.

Many Killed When Building Collapses

Faulty Material and Hasty Construction Blamed For Accident

Prague. The catastrophic collapse of a newly-constructed seven-storey building here may have taken a toll of 61 lives or more, it is feared.

Most of the victims were workmen putting the finishing touches on the building. Faulty materials and too hasty construction are blamed for the collapse.

The architect in charge of the construction of the building committed suicide when informed of its collapse. A woman pushing a baby-carriage was buried beneath the avalanche of brick and masonry with her child. A chauffeur passing in a motor car suffered the same fate, as did two coachmen and the four horses pulling their vehicles. About a hundred workmen were in the building when it collapsed.

Asks Leniency For Men

Viscount Lascelles Requests No Punishment For Incendiary Fire At Castle

Belfast, Northern Ireland.—Viscount Lascelles, husband of Princess Mary, has written to the government of the Irish Free State, asking that some way be found so that no punishment be inflicted upon the men who were arrested at Loughree in connection with the incendiary fire at Portumna Castle, the County Galway seat of Lascelles. He said that both he and Princess Mary would deeply regret if they were even indirectly the cause of suffering to anyone in Ireland.

Killed In Display Flight

Hendon, Eng.—A Royal Air Force exhibition for the Sultan of Muscat, who is visiting in England, ended in tragedy with the death of two fliers.

While one of the planes in the air display was speeding close to the earth in front of the grandstand its tail dropped off and the ship crashed violently. The victims were Flight-Lieut. Somerville and Corp. Loid.

WELSH IMPERIAL SINGERS

The famous Welsh Imperial Singers who arrived in Quebec on the White Star liner "Laurentic" recently. They are on a world tour under the leadership of Mr. R. Festyn Davies.

French Submarine Is Crushed By Greek Ship With Heavy Loss of Life

Farmhand To Stardom

Gordon McLeod, Now Touring West, Once Worked On Saskatchewan Farm

Winnipeg, Man.—A former Saskatchewan farm hand is now visiting the west under circumstances which can best be described as offering several varieties of vivid contrast. Years ago, as a lad, he was one of the humble toilers at the Indian Head Experimental Farm. He also, during that portion of his career, worked for a time at the Imperial Hotel there. At this moment, he is a stage celebrity.

The ex-harvester and student of the evening chores is Gordon McLeod, now heading his own London company on a transcontinental theatrical tour after being pitchforked into fame last year when he took Sir John Martin-Harvey's place on an hour's notice. Sir John was stricken ill in Toronto, and young McLeod filled the breach so sensationally that a number of Canadian financiers came forward and offered him the means to step into stardom.

Between the date of his earlier exertions at Indinn Head and his present visit to the same vicinity, he has played in China, Japan, Burma, from Cairo to Singapore, and from South Africa to London. During the war, he served under General Smuts in the campaign against German East Africa and later, as a junior lieutenant in France.

He has previously been starred in London, but this present year makes the first occasion on which he has scaled the theatrical heights for an international tour.

Tuberculosis In Cattle

Disease Being Eradicated By Means Of Restricted Areas

Ottawa, Ont.—Tuberculosis in Canadian cattle is rapidly being eradicated through the operation of the restricted area plan, Dr. George Hilton, veterinary director-general of the department of agriculture, declares.

Where in some areas as high as 7.9 per cent. of cows had been found infected on the first tests, re-tests had shown a general falling off to approximately one-half of one per cent.

"There is a persistent and increasing demand upon the department for restricted areas," Dr. Hilton said.

"Farmers have found that by replacing infected animals with high class stock they receive greater financial returns with less work."

Sails For Antarctic

Commander Byrd Commences Expedition To South Polar Regions

Los Angeles, Cal.—With thousands of his fellow countrymen at the harbor to wish him well, Commander Richard E. Byrd, U.S.N., turned his face this afternoon toward his newest adventure in the ice-crusted regions of the South Pole.

The expedition, which embraces 82 members, will cost approximately \$1,150,000. The money was raised by contributions from all parts of the United States. The primary purpose of the trip is to make accurate maps and procure important meteorological and other data of the South Polar regions.

Paris, France.—Crushed by the Greek steamer "Ekaterina Coulanderis" when she was cruising 37 miles off Vigo, Spain, the French submarine "Ondine" with 42 men on board, was buried under 7,560 feet of water, the Minister of Marine announced.

All men were given up as lost, as the submarine was built to withstand a depth of only 1,300 feet and undoubtedly was crushed when she sank, the Ministry said.

The collision occurred at 11 p.m., October 3, the Greek vessel reported when she docked, but at that time it was not believed that the water was more than 260 feet deep where the submarine sank. French warships, which reached the spot, reported the depth of the water where it was ascertained the Ondine and the Ekaterina Coulanderis collided.

Officials said that when the Ondine dropped below her calculated depth, she probably was flattened out by the pressure. They expressed the opinion that the Greek vessel, which reported the accident a week after the collision when she docked at Rotterdam, should have waited on the spot until daylight to seek survivors or wreckage, permitting positive identification.

Foreign Minister Briand has asked the League of Nations to establish responsibility for the disaster. The Ondine was one of the latest French second class type, with a surface cruising radius of 2,000 miles. She carried 39 men and three officers.

Despairing of rescuing any of the sailors on the Ondine, the Government, nevertheless, despatched every available vessel in the area to assist in dragging the sea bottom off Vigo. Even a school ship was sent to lend assistance.

It was considered a forlorn hope, however, as no submarine ever had been raised from a greater depth than 100 metres. Divers were said to be at work at the scene after the Atlantic squadron arrived at 8 p.m. and other ships with salvage apparatus were en route to the scene and the Spanish and Portuguese governments had offered to send aid.

Meanwhile, the ministry of marine was seeking to have Foreign Minister Briand make representations to fix the responsibility for disaster on the Greek captain who waited eight days before notifying the government of the collision.

Chamberlain Will Travel Across Canada

Reaches Victoria October 29, and Sails From Quebec November 15

Ottawa.—Sir Austen Chamberlain's Canadian schedule has been given out here. He will arrive at Victoria on the afternoon of Monday, Oct. 29, remaining there until Wednesday, Oct. 31, when he leaves for Vancouver where he spends Wednesday night. Sir Austen will leave Vancouver for Banff on Thursday morning. He will leave Banff on Sunday, Nov. 4, and arrive in Toronto early Wednesday morning, Nov. 7.

The next evening he will leave for Ottawa, arriving in the capital on the morning of Friday, Nov. 9. His stay in Ottawa will continue until Tuesday, Nov. 13, when he leaves to spend one day in Montreal. From Montreal, Sir Austen goes to Quebec, arriving in that city on the evening of Nov. 14. He will sail from Quebec the next day.

Amery Satisfied With Treatment Of British Harvesters

London, England.—Satisfaction that the great majority of British miner harvesters were employed under satisfactory conditions and that reports of generally bad treatment cannot be substantiated is expressed by Right Hon. L. C. M. S. Amery, secretary of state for the Dominions, in a letter to Right Hon. Arthur Henderson, chairman of the Labor party, made public here.

Mr. Amery's letter was in reply to one from Mr. Henderson in which the former home secretary said the attention of the national executive committee of the Labor party had been called to "various serious statements" regarding conditions under which the miners were employed and the treatment they received in Western Canada.

An officer was sent from England to Canada, and was still there, to deal with sickness and cases of genuine personal misfortune, Mr. Amery said. He mentioned that no harvester was adversely affected under the national insurance scheme.

"No doubt some cases of hardship have occurred and indeed ability to face some degree of hardship is indispensable but I am satisfied that no general complaint of bad treatment can be substantiated," Mr. Amery wrote.

"I am also satisfied that the great majority of harvesters got work under satisfactory conditions."

A Successful Experiment

Plan Of Bringing British Harvesters To Canada Has Been Fully Justified

The Montreal Star in a reference to the British harvester scheme remarks that when the idea of bringing thousands of British miners, out of work in the Old Country, across the Atlantic to help with the Canadian harvest was first mooted it met with considerable cynical comment. Doubt was freely expressed as to the likelihood of success. "The protest of a very small but vociferous number of grumblers when they arrived in the West served to provide the cynics with more material for comment, but this has been overwhelmingly offset by the fact that the vast majority of the miners were well satisfied, did their work to the satisfaction of the farmers, and did not grumble. Now the first small contingent on their way home have arrived in Montreal and express themselves as very pleased with their experience. They are returning with money in their pockets and they have enjoyed their experience."

"So far, so good," continues the Montreal paper. "These miners will have good things to say about Canada when they reach England, but the bulk of the army that came over still remains in the West. It is reported that many of the British miners have already turned to pick and shovel work since the conclusion of the harvest. If these men can be persuaded to stay here Canada will have gained a substantial and very useful body of settlers who will become good Canadian citizens. Even if only a small percentage of them remain, however, the big experiment will still have justified itself. Those who do will without doubt let their kinsmen at home know why they are staying and also how they are getting on."

Goose Raising

Fall Is The Proper Time To Select Geese For Breeding Flock

The autumn is regarded as the proper season to select geese for the establishment of a breeding flock. In a circular on goose raising, issued by the Department of Agriculture, at Ottawa, the author, Mr. A. G. Taylor, recommends securing well developed birds from good flocks before the fattening period commences in the fall. Stock from this year's hatchings are not likely to do as well as birds a year older. The sexes should be housed together even before New Year's, and should be kept so throughout the winter and the breeding season in the spring. Close housing is not required. Such shelter as a rough shed is sufficient provided it is supplied with dry bedding and protection from draughts and storm. Circular No. 55, published by the Department of Agriculture, at Ottawa, gives as a good winter ration for geese, equal parts of barley and wheat and about twenty-five per cent. of green feed, such as clover or alfalfa hay. Cabbage mangels, or turnips, finely cut up make an excellent green food ration. The circular gives explicit information on feeding during the laying season, the methods to be followed in rearing the goslings, and marketing the stock.

Pat was trying to harness a mule to the cart and resorted to forceful language.

"Can I be of help to you?" asked a preacher who was passing.

"Yes," replied Pat. "Tell me how Noah got two of these beauties into the ark."

Will—"What's become of the pet woodpecker you used to have?"

Bill—"I sold him to an antique furniture dealer, and he's got the poor thing working 18 hours a day making worm holes in tables."

The young man may be loaded down with brilliant ideas and theories, but he will eventually find they are not going to work very well—unless he does.

"It was very sad that you have lost your third husband!"
"Yes, if I lose the fourth I shall not survive it."—Vikingsen, Oslo.

N. W. U. 1755

Windbreak Needed

Around Bee Hives

Not Only Protects Them In Winter But Prevents Drifting

Protection from strong winds is very necessary about the bee-yard. Not only is protection all important in winter time to shield the colonies from the cold piercing winds which so quickly exhaust animal heat and cause losses, but also in all other seasons in order to prevent the drifting of the bees and to facilitate the work in the yard, writes A. H. W. Birch, Bee Division, Central Experimental Farm, Ottawa, Ont.

All experienced beekeepers are agreed on the point that the importance of a good windbreak can hardly be overestimated. Some even consider it of more importance than packing and prefer a windbreak without packing to packing without a windbreak.

Though well packed, colonies frequently die of exposure, therefore, in thinking about your preparations for wintering, about the construction of your winter cases and the amount of packing required, do not forget that all important thing the windbreak.

If, in a short time, a cold wind chills you who are well clothed, what will it do during a winter to your unprotected bees?

There are various kinds of windbreaks, some natural, others artificial. The natural ones are preferable and consist in protection from the north and west winds by thick woods, groves of trees, or dense shrubbery. Artificial windbreaks, on the other hand, must be used where natural ones are not available or while they are being established.

Though a good impromptu windbreak may be made by standing corn fodder or other such material against a fence on the windward side of the bee-yard, the artificial windbreak in most common use is that which is made of wood and which is similar to the snow-fences used by the railroads.

This fence is made in panels 12 to 14 feet long by 6 to 7 feet high, the boards of which are spaced 2 to 3 inches apart and nailed to 2 by 4 joists. In erecting this sort of windbreak, stakes should be driven into the ground and nailed to the braces to prevent the fences being overturned by strong winds.

Culmination Of Year's Work

Farmer Forgets Worry When Last Load Of Grain Is In

There is something very satisfying about having completed a task, but it is doubtful if anything gives the same delight and satisfaction as bringing in the last load of grain. It is the culmination of a season's efforts, the rewards of faith in a kind Providence to give seed-time and harvest. Preceding the bringing in of the last load there have been many days of toil in plowing, cultivating, sowing and reaping. Possibly a little worry has crept in as unfavorable weather or pests have threatened the crop. But all this is forgotten as the last load is being stored in the barn or in stack or forked into the machine. The satisfaction is all the greater if there is assurance that the yield will be high and the quality of grain of the best. While man has no control over the weather, he is a big factor in determining just what that last load will be.

Might Reach It

Madam Solo, the great soprano, after apologizing for her cold, sang: "I'll hang my harp on a weeping willow tree—ee-ee, ahem! On a weeping willow tree—ee-ee, oh!"

Her voice cracked on the high note and she tried again.

Then came a voice from the back of the hall: "Try hanging it on a lower branch!"

Had One Drawback

At a recent banquet in Chicago, those in charge hit upon the idea of setting off an alarm clock when the ten or fifteen minutes to which the speakers were limited had expired. The plan worked very well so far as the speeches were concerned, but we hear that some of the diners complained because the clock woke them up.

Two Irishmen met in the local hotel.

"So the landlord lowered the rent for ye," said O'Brien. "He'll save money at that."

"How so?" asked Casey.

"Sure," replied O'Brien, "it's less he'll be losin' when you don't pay it."

They were discussing silk stockings.

"They were invented in Queen Elizabeth's time," said the man who knows everything.

"Yes," commented another, "but they weren't discovered till the twentieth century."

Many Take Free Homesteads

Demand For Land In Western Canada Is On The Increase

An indication of the increasing interest and demand for homestead lands in Western Canada is given in the official figures for homestead entries for the first eight months of this year. From January 1st to August 31st a total of 8,618 entries were made on land offered free by the Canadian Government in blocks of 160 acres in Manitoba, Saskatchewan, Alberta and in parts of British Columbia. This is an increase of 4,325 over the total number of entries made in the first eight months of 1927. For the period under review this year 348 entries have been made on homestead land in Manitoba, 2,811 in Saskatchewan, 4,976 in Alberta, and 453 in British Columbia. All homestead lands are offered by the Canadian Government to British subjects and those who declare their intention to become a British subject on payment of registration fee of \$10.00, and performance of certain improvement and residence duties by the settler before the title to the land is granted. This homestead land is now considerable distance from the railways but there are also still millions of acres of good farm land near railways, markets and schools at prices from \$15.00 an acre upwards.

Wife: "Why didn't you give that lady in the passing car at least half the road?"

He: "I would have, gladly, but I didn't know which half she wanted."

Mr. Upward: My boy, what is your chief aim in life?

Tommy: Well, most of the time I aim at the Joneses dog.

Meat Prices to Soar

Ranchers In Western Canada Look For Expansion Of Cattle Industry

Ranchers in Western Canada may prepare for the expansion of the cattle industry on an unprecedented scale, while Canadian housewives in common with those of the United States may expect a long period of high meat prices, according to officials of the B.C. Department of Agriculture. The United States faces an acute shortage of meat, they say, and with 1,250,000 beef animals below normal, is looking to Canada to feed itself. This demand for beef across the border is being felt in Western Canada already with soaring meat prices and extensive plans for movement of live cattle to American points for fattening.

Manitoba Creameries To the Front

Gathered Up Lion's Share Of Prizes At Eastern Canadian Fairs

Manitoba creameries won 11 out of 24 prizes at the recent Western Fair, in London, Ontario, according to a communication from Frank Hearn, dairy commissioner for Western Ontario. At the recent Canadian National Exhibition, in Toronto, Manitoba took 47.9 per cent. of all prizes offered under the group system and 64 per cent. of all first placings.

Leonard: "Roll on, thou mighty ocean! Roll on!"

Dolly: "How wonderful you are, Leonard. It is rolling on!"

Howell: I figure that my time is worth a dollar a minute.

Powell: That's all right. I only want 50 cents' worth of it.

Ready For Another Start

Aged Turk Loses Century Old Beard and Feels Young Again

Zaro Agha, at the age of 157, has sacrificed his mustache and beard for his country's good.

Zaro holds a minor municipal job. He responded to the city edict urging all employees to be clean shaven. It took Zaro more than a century to cultivate his splendid whiskers and he relinquished them with a sigh, but was consoled by the improvement it made in his appearance. He looked half a century younger.

Zaro thereupon decided to replenish his stock of wives, three of whom have died of old age, leaving him only one. To his dismay he ran against the new law prohibiting polygamy.

In an interview Zaro explained his hopes for the future. He is eager to start life anew in a fresh job and improve his standard of living, he said.

A "social climber" had been abroad in Europe. Upon her return she was asked by a lady accustomed to travelling: "And you saw much of the Pyrenees of course?"

Social Climber (hesitating only a moment)—Oh, yes, indeed, we dined with them on several occasions.

Briggs—"I've lost my new car."

Griggs—"Why don't you report it to the sheriff?"

Briggs—"He's the one that took it."

Speaker—"Didn't you think my talk on politics was well-timed?"

Friend—"Yes. Several people in audience kept looking at their watches."

Peace River Country Fertile

Immense Area Of Good Farm Land Three Hundred Miles Northwest Of Edmonton

Three hundred miles north and west of Edmonton lies the Peace River Country, which now occupies so large a place in public attention as a new field for settlement and agricultural development. The area of the Peace River District is approximately 47 million acres. It is over six times as big as Belgium, and exceeds the combined area of the six New England States. It lies in the same latitude as portions of Scotland and Denmark.

The Peace River country enjoys a combination of favorable climate, moderate precipitation, and deep fertile soil. It lies in long easy slopes, watered by the Peace River and its tributaries, well drained and well adapted to cultivation. In the present season the crops in the Peace River District have been not only among the finest in Western Canada but among the earliest harvested. Yields of wheat in many instances have run as high as 67 to 72 bushels to the acre.

It will be remembered that it was in the Peace River District that Herman Trelle, in 1926, produced the wheat and oats both of which captured the world's grain championship at the International Livestock Grain and Hay Show at Chicago.

Showed Himself Good Sport

British Motorist Did Not Resent Damage To Car

Lieutenant-Colonel R. C. Fielding, D.S.O., told of an incident both amusing and peculiarly British. In backing his car into vacant place in a parking place in the West End he accidentally bumped into a vacant car and tore its mudguard. He left his card with that watchman to pass on to the owner of the damaged vehicle and await developments. In due course he received a letter from the injured party. This is how it ran: "Dear sir,—Your card was handed me by the car watchman in Avery Row stating that you had damaged the right-hand mud-guard of my car. I am only writing to tell you that the damage you have done to this mudguard has now made it the same as the other three, thus again balancing the design of the car. In face of this, I extend to you my apologies for causing you any anxiety in the matter." And they say sportsmanship is dead.

Will Benefit Canadians

May Live In Canada and Work On U.S. Side Without Interference

Canadians, whether born in Canada or elsewhere, may live in the Dominion and work on the United States unhindered by existing United States immigration laws. This is the effect of the refusal of the Supreme Court of the United States to review the judgment of Mr. Justice Hazel of the New York federal circuit court in Buffalo some months ago, giving Canadians the right to commute across the border daily to transact their business.

Leave to appeal was asked by the United States department of immigration, and the Supreme Court adjourned without deciding whether the case was arguable. The Supreme Court decided it was not arguable, thus making the decision of the lower court supreme.

Antique Dealer: This 'ere vase is 3,000 years old, and this 'un is a modern imitation.

Customer: Really! May I handle them?

Antique Dealer:—Er—yes, only don't mix 'em or I shan't be able to tell 'tother from which!

"Can't sing the right tune, can't I? I'm glad to think I've a better ear for music than you have."

"Well, sing with your ear, then. What comes out of your mouth is horrible."

Rube: "What do you think about this here evolution?"

Yokel: "It's a good idea—but can they enforce it?"

"Poor fellow, can I save him? Too late! He is already quite cold!"—Dorffbarber, Berlin.

SASKATCHEWAN GOVERNMENT'S OIL-GRAVEL ROAD SURFACING EXPERIMENT

Mechanical monsters of weird shape and strange device have been brought to Saskatchewan in connection with the important experiment being conducted by the Provincial Department of Highways, in the oil-graveling process of surfacing "gumbo" roads.

The process is similar to that which has been found successful and satisfactory on roads in Minnesota and North Dakota, and, if successful on the highway between Pense and Pilot Butte, will furnish the solution of Saskatchewan's highway surfacing problem.

Asphaltic oil spread over the planned road surface before the gravel is applied, forms a waterproof coating impervious to rain so long as it remains intact, which also prevents

the gravel from being "eaten up" by the gumbo. Tests of the waterproofing have been made and, if the surface withstands the winter frosts and spring breakup, the treatment will have proved successful.

The Saskatchewan experiment is first of the kind in Canada and the results are awaited with interest by highway experts and other Provincial Government.

The mechanical equipment employed in the work represents, alone, an investment of approximately \$125,000. Some of the machines used are depicted above.

No. 1—This is a view of the great Caterpillar Tractor which drives the gravel crushing machine.

No. 2—Shows the Government gravel pit, situated near Pilot Butte, and the \$80,000 dragline excavator

which "feeds" the coarse gravel to the crusher.

No. 3—The Russell gravel screening, crushing and loading machine, purchased by the Provincial Government at a cost of \$12,000. It grinds the coarse gravel to the required "pea" size, and loads the crushed gravel into trucks.

No. 4—Here is seen the Barber Green loader transferring gravel from a string of flatcars into trucks.

No. 5—The giant oil sprinkler, the tank of which has a capacity of 850 gallons. It travels under its own power, and, by a heater attachment, keeps the oil mixture at the required temperature.

No. 6—The final process. A blade grader, following in the wake of the oil sprinkler, spreads the gravel over the freshly oiled surface.

CHAPTER III.—Continued.

Jaet laughed. "I will go now to give you the chance." With a playful flick of her whip toward Douglas, she was off like an arrow.

Donald turned to his friend. "I hope that you are satisfied now that you have made an ass out of me."

"Quite happy, old dear. I didn't find it a hard job."

Donald laughed. "I'll race you to the gym."

As the bout was to take place on Monday, this was to be the last day of training. The fans who had flocked to see Donald in his work-outs admitted that he had wonderful speed, but would be unable to stay the twenty rounds with the formidable Garriau. The verdict of the know-lag ones was that it would take more than a snappy left hand to lift the laurels from the champion who possessed the virtue of the terrible punch.

To the boxer training is a trying ordeal. The daily grind of road-work, bag-punching, rope-skipping and puley work becomes monotonous. The nerves become frayed, and if the weight has to be materially reduced the boxer develops a bad temper and is anything but a cheerful companion.

As Donald prepared for bed that night he thought with relief that the morrow would be a day of rest. "I'll be glad when it's over," he mused. His meditations were interrupted by a rapping on the door. In answer to his invitation to come in, the door opened and a small man of unappreciating appearance entered.

The visitor was indeed a most repulsive man, of uncertain age, and with skin of a sickly yellow. One eye was sightless, which he ascribed to an accident during a football game. Those familiar with his shady past averred that it was caused by the vigorous application of an adversary's thumb during a bar-room brawl.

"I'm Garriau's manager," he said importantly.

"What do you want?" demanded Donald shortly.

"Now, see here, Kid. We've got a dead end to cop de change. It's this way. You're a amachoo widout a chance in de world to beat de Slugger. Get me? Well, dere ain't a bit of sense of de Slugger beatin' you up for nuttin', so we frames de bout. De heavy-bettin' will be on de Slugger, so we fixes it for de Slugger to go 'till about de tent' round, so's to give de fans a run for dere money. We gets all de money dat we can beg, borrow and steal and puts it on you to win. We puts up a slam-bang fight. You can take de drop a couple of times, and dea down goes de Slugger. De fans will just eat it up. De tent' round will find you stannin' toe to toe, den de last minute you sends home de fake sleep-punch. De boobs will tink it's on de square. Den in a mont' we gets a return fight and we pulls off de 'grudge stuff' and we packs de house. Of course, we have

to win den, and all our money will be placed on de Slugger. Dat means dat we cop de change twice. Get me?" His ugly lips parted in what he intended as an lagratiating smile. "You come up to de club tomorrow and we rehearses de whole ting. Get me?"

Donald's face turned pale with rage. "I get you, you damned little rat!" he rasped. Seizing the surprised Pursell by the collar, he jerked him to his feet, dragged him to the door, and threw him out with such force that he struck the wall with a thump and fell in a heap in the floor.

Pursell rose with a snarl that showed his yellow teeth. A look of bestial hate shot from the one gleaming orb. "We'll kill you Monday, you —" The air was filled with the vilest oburgations.

Closing the door, Donald walked to the windows and opened them wide, as though to rid the room of the air his visitor had breathed. "I never dreamed there was so much rottenness in the shape of a human being," he said disgustedly.

At the same hour, at the other side of the city, Douglas was also entertaining a visitor, but of a very different type. He had just entered his room when he heard his sister's voice.

"May I come in a minute, Doug?" Jaet came to the point quickly. "Who is this Mr. McLean who was with you today?"

"Oh, that was—er—Donald McLean," he answered evasively.

"You know what I mean. Who is he? What is he, where does he come from?"

"I'll look him up in Bradstreet's."

"Do be serious, Doug."

"Is it a serious matter, Sis?"

"I think he is interesting," she replied hesitatingly.

"So do I. I liked him the first time I saw him," said Douglas warmly.

"Well, you haven't answered my questions yet," persisted Janet.

For all his fluency of speech Douglas was for the moment nonplussed.

"Let's see—er—what was the first question?" He was sparring for time.

"Don't quibble, Doug. Where did you meet him?"

"I met him a long time ago through an intimate friend by the name of Pettray. McLean is his partner. Firm name McLean and Pettray."

"What is their business?"

"Oh—er—glove business."

There was an interval of silence.

"I'm not a had little liar," thought Douglas.

"I wonder if she's finished."

"He yawned strenuously and stretched his arms. "My! I'm sleepy," he said.

Jaet rose slowly and moved toward the door.

"Are you going to ask him out some time?" she inquired.

"Sure thing!"

At the door she turned. "Will you let me know when he is coming?"

"Yes, dear."

"Good-night, Doug."

"Good-night, Sis."

Douglas stood for a while staring into nothingness. "I—don't blame her," he said aloud. "I don't know anything about him, but I'll bet he is a real man."

CHAPTER IV.

The arena and the grand-stand were packed, the S.L.O. sign having been hung out at two o'clock. The cosmopolitan crowd sat in solid

ranks, tier upon tier, from the select ringside seats to the topmost rail. Judges, lawyers, doctors and bankers sat with labourers, miners, loggers, hatters, and bootblacks. Men of the underworld sat side by side with men that make and administer our laws. There was a sprinkling of Japs, Chinamen and negroes. The turbaned Hindu made bright splashes of colour here and there in the vast sea of faces. Of class distinction there was none; all welded as one in the love of the boxing game.

The preliminaries were over, and the vast crowd had settled in their seats. Suddenly there was a stir, a craning of necks. Down the aisle on the west side of the arena came Donald, followed by Andy and the two seconds, the latter carrying buckets, sponges, towels and bottles. Donald wore a dark-coloured bathrobe thrown over his shoulders. There was a murmur of applause that swelled to a tumult as he clambered through the ropes. He seemed cool as Andy piloted him to the corner, but as he sat down and stretched out his long legs, he appeared ill at ease.

Although the crowd had given him a handsome welcome, prophecies were shouted down from the top seats that he would not last very long with the formidable champion. Donald was palpably nervous, as evidenced in the quick turning of his head and the shuffling of his feet. He looked slight and frail as he leaned forward in his chair, the black bathrobe accentuating the paleness of his face. A feeling of friendliness came over him as he gazed at the huge, strange crowd who were loudly predicting his defeat.

A well-known judge, wearing glasses and a big black hat, turned to his companion. "It's a hanged shame, Tom, to match that slim boy with a brute like Garriau."

The one addressed was one of the City's leading dentists and an ardent boxing fan. "Don't you believe it, Bill," he returned. "Just wait until you see this boy strip."

"Here he comes!"

A roar of applause greeted the champion as he came down the east aisle bowing right and left in answer to their plaudits. His dark, massive body seemed fairly to shine as he leaped to the ring with easy grace and stripped off his robe. He stood in his corner with his hands on the ropes, shuffling his feet in the resin, still smiling and glancing about the arena. Evidently he loved the limelight.

(To Be Continued.)

Cleopatra's Needle In Position Fifty Years

Queen Victoria Was Interested In Its Arrival At London

It is 50 years since Cleopatra's Needle was set up on the Thames Embankment, in London, England.

The event (interest in which was increased by an adventurous voyage that nearly wrecked the enterprise), aroused the interest of thousands of Londoners, who gathered on the riverside to watch the arrival of the obelisk from Alexandria, towed by the Channel tug Anglia.

By using hydraulic rams, John Dixon put the Needle in position in about half an hour. At 3.30 it was upright, and a wild cheer rose from the crowd as the Union Jack and the Egyptian flags were run up on flag-staffs nearby.

All kinds of gifts, to remind posterity of the life of early Victorians, were placed at the base.

A railway guide, Bibles in different languages, a feeding bottle, a razor, a portrait of Queen Victoria, a box of hairpins, "photographs of a dozen pretty Englishwomen presented by Captain Henry Carter," a set of coinage, a pound weight, a foot measure and sundry articles of female adornment, were among the articles deposited.

Queen Victoria was so interested that when the obelisk arrived, an official statement was issued that she was "much gratified by the safe arrival of the Needle."

Although brought to England only 50 years ago, Cleopatra's Needle, which has no connection with Cleopatra, was presented to the British nation by Mohammed Ali in 1819.

The Needle, of pink granite, now black through exposure, was erected at Heliopolis by Thimmes or Thutmosis II., a sovereign of the 18th Dynasty about 1500 B.C., and dedicated to Tun of Heliopolis.

Snippy—"Are these eggs fresh?" Grocery Boy—"The man just brought them from the country."

Snippy—"What country?"

He: The mere fact that you refused me doesn't worry me. There are others.

She: That's why I refused you.

Iron Ochre Discovery

Valuable Find Is Made In Northern Saskatchewan

Discovery of deposits of iron ochre estimated at 50,000 tons has been made near Makwal Lake, Saskatchewan, by William O. Neal, of Ker-robert, who has staked claims under the Dominion quartz mining regulations.

Makwal Lake is almost due north of St. Walburg, the end of the steel on the Canadian National Railways. It can be reached by automobile over rough trails. The ochre deposits were found just south of the south-east arm of the Makwal Lake and a rough estimate suggests that something like 50,000 tons of rich red iron ochre, varying in depth from three to five feet, are available.

Iron ochre has many uses. It is used extensively in the manufacture of paint, for coloring floors, for coloring sand lime brick, as a filler in the manufacture of rubber goods, paper, oilcloth, for coloring match heads and for coloring stucco.

Both the quality and quantity of the iron ochre deposits discovered at Makwal Lake are stated to warrant commercial development. Samples are now being tested for the Department of Railways, Labor and Industries to determine the various properties of the ochre.

Radium Rays Greatly Increased By Platinum

Effect Of Super Ray Ten Times Greater Is Claim

Alois Fischer, Vienna chemist, has succeeded in plating radium with platinum, greatly augmenting the ray strength which is reported to be ten times greater than that of radium alone. Dr. Heiser of the St. Joachim-institut announces the successful use of the new super ray in many cases of cancer and other malignant growths with no danger of burning and other risks as with simple radium. Also, an advantage of the new ray is that it requires a minimum of radium, making possible the general use of radium points where radium is too expensive.

As a vermifuge an effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

It is said that human beings unconsciously associate a color with a particular sound. To the pedestrian a motor horn suggests both black and blue.

Minard's Liniment for aching joints.

"Tufus, this road is awful steep. Can't I get a dokey to take me up?" "Lean on me, darling."

All the main railway lines in Rumania are owned and operated by the State.

FARMER'S WIFE GETS STRENGTH

By Taking Lydia E. Pinkham's Vegetable Compound

Wilton, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound through the Chicago of Life. It helps me and I cannot praise it too highly. I was troubled with heat flashes and my limbs were heavy so I could hardly walk to do my farm work. I saw in the newspapers your ad about the Vegetable Compound and thought to give it a trial. The first bottle gave me relief and I have told others what it does for me. I am willing for you to use my letter if you choose."—Mrs. D. B. PETERS, Wilton, Ontario.

THERMAL CHANGES

You are fond of ice cream during the hot weather, and of iced drinks. But you noticed that upon your last visit to the soda fountain, a certain tooth pained momentarily as you were enjoying your favorite dish.

Or, some toothsome sweet made it "sting"; and also, you found it more comfortable to take your tea not quite so hot. But of course, it isn't bad enough to make a fuss over; a little care exercised and it will be alright again.

So you think. Now what is happening? You have suspected, and rightly so, a small cavity.

While Nature saw fit to place nerve and blood tissues within the tooth, yet she protected them with the very hard outer covering, the enamel which was meant to remain intact throughout the life time.

But through no fault of Nature, disease has crept in and her plans yet baffled, for she has placed just within the enamel covering, tiny tissue filaments which communicate with nerve endings in the pulp chamber. These respond to thermal changes, sweets and acids, and instantly there is telegraphed to headquarters in the brain, the warning that something is wrong—just as when you put your finger on a red hot stove.

So forewarned, there is yet ample time to prevent more serious trouble if you would but do your part and act promptly by having repairs made.

But do you?

If Miller's Worm Powders needed the support of testimonials they could be got from mothers who know the great virtue of this excellent medicine. But the powders will speak for themselves and in such a way that there can be no question of them. They act speedily and thoroughly, and the child to whom they are administered will show improvement from the first dose.

Sound Beam Is Success

Men In Dirigible Distinctly Hear Program Of Music

Announcement is made by the Victor Talking Machine Company that the practicability of directing beam sound waves to a definite point had been demonstrated. Officers of the navy dirigible J-4 flying high above Camden, N.J., the announcement stated, distinctly heard the voices of Victor officials, a program of music and constant tone signals sent up to them by the recently developed super-directional horn mounted on the roof of a 10 storey building.

The new horn sent out a beam of sound which at all times was trained on the dirigible much as the beam from a giant searchlight would have been played on it.

People Who Kill a Town

Those who oppose improvements. Those who distrust public-spirited men. Those who over-advertise their business. Those who show no hospitality to anyone. Those who hate to see others make money. Those who oppose every improvement that doesn't originate with themselves. Those who put on an extra-long face when a stranger talks of locating in their town. Those who oppose every public enterprise that does not appear of personal benefit to themselves.

No one need endure the agony of corns with Holloway's Corn Remover at hand to remove them.

People are preoccupied. Always putting off something till tomorrow, instead of the day after tomorrow.

Minard's Liniment—Popular for 50 years.

"All things are relative," says a philosopher. Alas! no. The slower the driver's wits, the faster he goes.

The need of the times is a vehicle you can ride down town and then fold up and carry into the office.

Little Helps For This Week

"Not my will, but Thine be done."
—Luke xxii. 42.

Whatever my Father wills is best, Delight or suffering, toil or rest,—Thine eye, and Thine alone, can see What I should have, and do, and be. I only ask that I may know The way which Thou wouldst have me go;

That I, my will in Thine may lose; That what Thou, Lord, for me shalt choose.

I, too, may choose.

—C. W. Harris.

There are no disappointments, it has been said, to those whose wills are bound up in the will of God.

—The Light Of The Conscience.

Even if a worm does turn he's just the same on the other side.

Are You Ready

When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them, but you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot put away. And it's always ready for the crueler pangs of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

Fletcher's CASTORIA

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

HERE AND THERE

Glenn Woolley left last Monday for Calgary, where he will attend school, this winter.

Allen Weaver left last Tuesday, for Hanna, where he will spend the winter, working in the Government Vendor Store.

It is kindly requested, that every one who enlisted in the late war, call at once at the Drug store.

The short course on home nursing given under the auspices of the Womens Institute, by Miss Conroy was very much appreciated by those who attended. Miss Conroy will be in Raymond in the near future. She has expressed her willingness to give a health talk to the girls of 'teen age.

On Thursday November 1st the Sunset Concert Co. will appear at the Capitol Theatre in conjunction with a Picture Program. This trio is high class artists, who have played in some of the best houses in the United States, and have been with Chautauqua for two seasons.

Warning has been made by the courts regarding the usage of previously used stamps in the summary justice dealt offenders in this matter. Of recent date is the prosecution of F. Tornowski, of Trochu, Alberta, for this offense. He was fined \$30 and costs, the judge being lenient in the matter because the offender had been in this country only one year.

The Maple Leaf Bakery has installed a new power moulder. The addition of this machine makes the bakery power equipped in every department.

Fox Farmers Meet

A meeting was held last Monday night comprising the group of men owning the foxes that make up the fox ranch located at Holmes' farm. It was decided each member would talk care of his own foxes in the future, owing to the increase in number the past few years.

A number of foxes will be pelted some time in November. The price will all depend upon the quality of the fur.

Members seem to be very optimistic regarding this new industry. A fair increase has been realized this year.

We note considerable difficulty encountered by the Womens Institute and the Chautauqua. Both parties desiring the Opera House the same night.

We trust some satisfactory agreement can be reached in this matter.

The first ward primary entertained the stake primary, the stake presidency and the bishopric last Monday evening at the High School. The evening was spent in dancing and games, a tasty lunch was served.

A quiet wedding occurred at Lethbridge on Saturday, October 20, when Gladys Green, daughter of Mr. and Mrs. Albert H. Green, of Raymond, became the bride of Frank William Liddle, son of Mr. and Mrs. Arthur M. Liddle, of Burdett. Bishop Smith officiated. The young couple was attended by Mr. and Mrs. Alpert H. Green. Mr. and Mrs. Liddle are taking up their residence at Stirling.

FOR SALE—3 heaters, 1 ax-minister rug 9 x 12 ft. 1 red plush couch. 1 walnut radio table. 1 Burbank range. 6 chairs. New Ampliphonic. Beautiful silk panels and drapes. New Maytag electric washer. Bargains for cash—Apply to R. C. Graham.

It would be greatly appreciated if anyone desiring help on Saturdays and after school would notify the School of Agriculture officials, as they have a number of students desirous of working for their board.

Winter Months

What are YOU going to do during the next four or five months?

Every young man, and young lady too, living on a farm should have a practical knowledge of bookkeeping and business principles. Our Elementary Bookkeeping Course can be completed in from three to four months. Besides bookkeeping this course includes instruction in Penmanship, Spelling, Arithmetic, Letter Writing, Commercial Law and Typewriting.

You may enter at any time but try to start next Monday. Write for Free Curriculum.

I BELIEVE

I BELIEVE in the staff I am
handling out, in the firm I am
working for, and in my ability to
get results. I believe in working,
not weeping; and in the pleasure
of my job.

I Believe that a man gets what
he honestly goes after, that one
deed done today is worth two
deeds tomorrow, and that no man
is down and out until he has lost
faith in himself.

I believe in today and the work
I am doing; in tomorrow and the
work I hope to do, and in the sure
reward that the future holds.

I Believe in courtesy, in kind-
ness, in generosity, in good cheer,
in friendship, and honest competi-
tion.

I Believe there is something do-
ing somewhere for every man
ready to do it.

I Believe I'm ready—right now:

—Elbert Hubbard

The Halloween Party

(By AMY L. ALLEN)

For over a week there had been a very great deal of animation among the school children over the different home parties planned for Halloween. For nearly two weeks many of the Jack-o'-lanterns had been made and stowed away for the "big time" as the boys put it. Everything went fine among our crowd as the girls styled themselves until two or three evenings before the eventful night when the girls decided to bar the boys from the party to be held at Alice's house, the biggest and best furnished home in the little town of L---

Alice was a sweet little miss with laughing blue eyes and golden curls which were the envy of her classmates and a source of mischief to the boys, as there was nothing that vexed Alice quite so much as having her pretty curls spoiled. Whenever one of the boys chanced to pass her, his eyes sparkled and his mischievous hands reached out to grab her hair. Many times it was just a mischievous movement, but Alice's eyes would flash fire and then there was always a burst of laughter from the boys. This was the cause of the trouble on that particular night. The boys were terribly put out, saying, "Silly, we were just in fun." But when Alice's mind was made up she was hard to convince that she ought to change. So the boys left and they parted with many a backward thrust. One of the boys called, "Well, we'll beat you at your own game. We'll have the best time, you see if we don't," while another called, "We didn't want to go to your old party anyway; we can have more sport by ourselves." But the girls went on their way with heads up, never a backward glance, as a sign they even heard.

The boys made their way to Mrs. Brown's. They always knew they were welcome there. Mr. Brown was settled in the easy chair, reading the evening paper, while Mrs. Brown was clearing away the supper dishes.

"Hello Mrs. Brown," came from the crowd as they answered the summons to come in. "Where's Hal and why wasn't he at glee practice," came from the foremost boy.

"Oh," said Mrs. Brown, "I suppose he forgot. I didn't even hear him mention it. Take some chairs, he will be here in a minute and can explain. Were the rest of them there?"

"Most all," said Charles. "Just one or two of the girls missing."

"Well, why aren't you boys seeing the girls home?" asked Mrs. Brown.

"Oh, they went off miffed, so we thought we would drop in and see Hal for a little while."

Just then the door opened and Harold walked in with a big bucket of milk.

"Oh, hello, what's the joke? A surprise party?" called out Hal.

"You've said it," came from one of the crowd. "The girls have gone off mad and I guess if we have a Halloween party we will have to get busy. Alice says we can't go to hers. Anyway, we'll have more fun by ourselves. Will here has a fine plan if we want to carry it out."

"Well," said Harold, "let's hear it while I wash my hands." Will was rather backward in presenting his plan but with a little persuasion began. "Well you see," he said, "after the girls have been so mean as to pass us up, we ought to get it back on them. I heard them planning the whole thing and I know where the magic lanterns and mirrors are placed and all about their lunch. We sure can fix them. Then we could make a straw man and use the worst Jack-o'-lantern we've got for its face and put it in old man Jenkins' door, knock and let him find it. Gee, but won't it get him? He is such a stingy old duffer. You can't go by his house whistling a decent tune but what he complains on you or preaches in meeting about it. He thinks he owns both land and air for blocks around his old place. I'd sure like to get even with him for once."

During this recital the boys' eyes sparkled and they could hardly control their bursts of laughter until the close, when there was a movement of the paper and Mr. Brown looked up and said pleasantly:

"Well boys, I couldn't help hearing those plans and before you adopt them I'd like to tell you a story. I suppose you boys think that because I hardly ever side in with your doings that I never played like normal boys do. Some way I have left all the fun making to my wife here of late years. She's a capital hand to help in such things. I seem to be content to just

sit back and laugh at the sport the other fellow makes. But believe me when I tell you that real good fun is just the thing occasionally to keep us going. So that is the reason I want to take a hand in this thing just for once. I'll begin by telling you my story. I was a boy once myself, even if it was a long time ago, and like you boys I was out for all the good times I could get to come my way, especially on Halloween. There was an 'old man Jenkins' around the corner too, but he is dead now and I sometimes think he is in a better place than I ever can find when I leave this old earth of ours. We, 'our crowd,' as we called ourselves, were out for a time on this particular Halloween evening I am telling you about, so we too made the straw man minus the Jack-o'-lantern face. You see we were not so smart at planning as our friend Will here, but we made a dough face and that was ghastly enough. At a given signal we placed it in our Mr. Jenkins' door, knocked and stood waiting. We were just near enough to hear the tap, tap of the old man's cane, and when the door knob began to turn our excitement was almost to the hursting point. The next minute we were paralyzed with fear as the light fell on the object, and the old man staggered back and fell full length on the floor.

"We all decided we had better make tracks while the going was good, and were about to do so when one of the boys whispered, 'Say, you kids, let's get that dummy or some one will recognize the clothes.' One of the crowd sneaked close up and drew away the straw man, just as the old man moved and groaned out with pain. We went through the back alley, took the straw man to pieces and put the straw very carefully back where we got it and made our getaway, a much worried bunch of boys. Well, I crept up the back stairs when I got home, taking my shoes off at the door, and slipped into bed, covering my head with the clothes to shut out the light, but it was of no use for I could still see the ghastly face of the straw man and the stiff and silent old man on the floor. Soon I heard quick, hasty footsteps and uncovered my head to hear if they were turning in at our gate. I didn't have long to wait. A loud, hurried knock, a quickly opened door and I knew our guilt would soon be found out. I sat up in bed to listen. A neighbor had been passing and had seen, through the open door, the old man as he lay upon the floor. The neighbor picked him up, laid him on his bed and had come for father to see what had better be done. 'We had better call the doctor at once,' father said, and turning to mother, asked if any of the boys were at home. She said she would go and see; then I heard her stop at my door. She called and shook me three or four times, then my eyes opened sleepily and I answered, 'what is the trouble?' 'Trouble enough,' said mother; 'someone has frightened the old man Jenkins and he is very sick. Father wishes you to dress quickly, take the pony and go for the doctor.' 'I lost no time in doing so. I wanted to be out in the air. I wanted to be alone.

"The doctor said he would take his own horse and that I had better ride back and tell them he would be there as quickly as possible.

"I rode back to the old man's house and called father out. I wanted to talk to him in the dark that he might not see my tell-tale face.

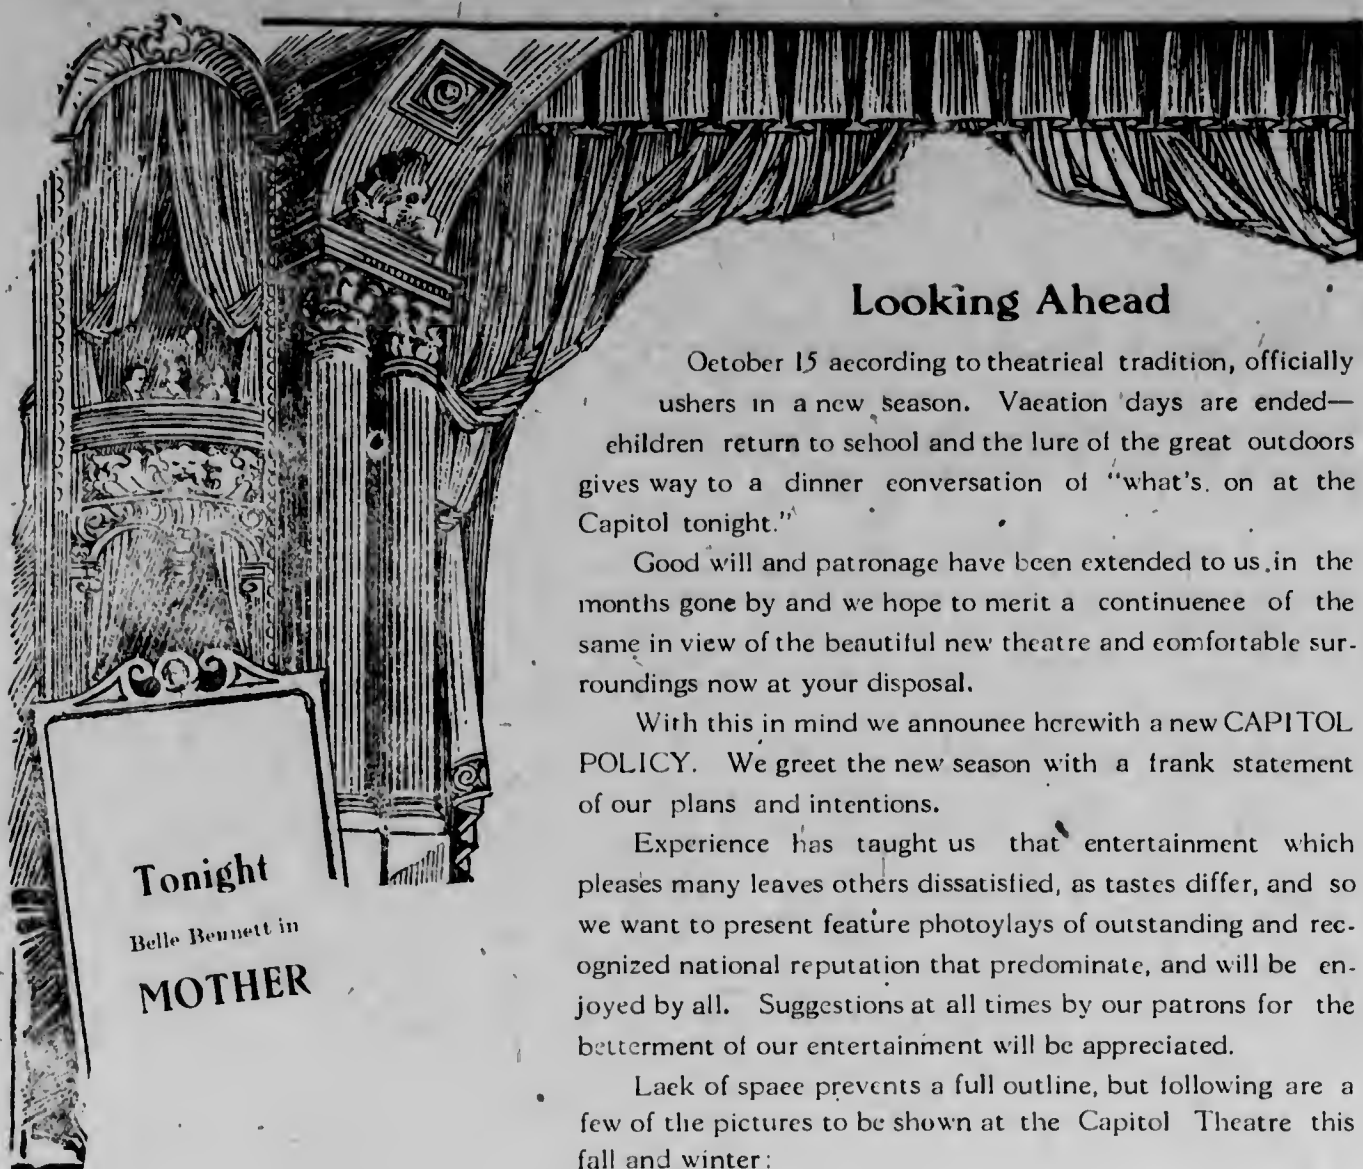

"Will the old man die?" I asked him.

"We can tell better perhaps when the doctor comes," father answered. 'But I am quite a bit worried. He seems pretty bad and is talking a lot of nonsense about somebody frightening him. I'm afraid there has been some mischief done here. I'm sure glad, George, you were home and in bed. I don't think the older boys would get mixed up in anything like this.

"Well I was glad to get back to bed, and I might as well tell you I didn't sleep any more that night, and but very little for several nights following. The old man didn't get much better and it was a long expensive joke we had played on him. After a few weeks he was carried out, and up in the barn loft a crowd of mischief loving boys sat watching through the cracks and knot holes the few slowly moving wagons that

OVER

Halloween Supplement to the Raymond Recorder

Looking Ahead

October 15 according to theatrical tradition, officially ushers in a new season. Vacation days are ended—children return to school and the lure of the great outdoors gives way to a dinner conversation of "what's on at the Capitol tonight."

Good will and patronage have been extended to us in the months gone by and we hope to merit a continuance of the same in view of the beautiful new theatre and comfortable surroundings now at your disposal.

With this in mind we announce herewith a new CAPITOL POLICY. We greet the new season with a frank statement of our plans and intentions.

Experience has taught us that entertainment which pleases many leaves others dissatisfied, as tastes differ, and so we want to present feature photoplays of outstanding and recognized national reputation that predominate, and will be enjoyed by all. Suggestions at all times by our patrons for the betterment of our entertainment will be appreciated.

Lack of space prevents a full outline, but following are a few of the pictures to be shown at the Capitol Theatre this fall and winter:

"The Circus", "The Patent Leather Kid", "The Fleet's In", "The Gaucho", "My Best Girl", "The Wedding March", "Sorrel and Son", "Lilac Time", "The Burne Lady", "Mother Machree", and return engagements of "Ben Hur" and "Wings". Also high class vaudeville whenever an attraction of merit is available.

(Continued from the other side)

were carrying the mourners and the body of the lonely old man. We didn't say much, but I am sure each felt just as I did, that it would be a long time before we could forget."

Mr. Brown picked up his paper and resumed his reading, but the boys sat silent until one of them said, "Say, boys, let's go home and meet again tomorrow night. I think Will's fertile brain can hatch up something new."

"Meet here at 8 o'clock sharp," said Harold as the boys said good night.

Promptly at 8 o'clock the next evening a knock sounded on Mrs. Brown's door and the welcome sound of Mrs. Brown's voice was heard calling, "Come in. We are all ready for you," she said as the happy crowd of boys entered.

"Say boys, let's let father propose a plan for us," said Harold.

"Agreed," came in a chorus from the boys.

"Well," said Mr. Brown, "this is rather sudden, but if that's the decision, I think I can help you boys have one of the happiest Halloweens you have ever known. First, I want each of you boys to get your mother on your side, for there will be something to do and something to give. I was out to the old cabin today where you boys always camp when you are out duck-hunting and I was surprised to find it occupied by a family of newcomers, strangers in the community, and I am sure they have very little of anything in the house to eat. Hungry and cold! Can you imagine

any one living near our homes in that condition? I don't need to ask if you are interested. I can see it written all over your faces. Well, how would you boys like to get the biggest pumpkins you can find and make your Jack-o'-lanterns from them, for there's a crowd of youngsters out there that will enjoy them, I can tell you. Then your mothers will fill them with good things that go to make up a big dinner, and it won't hurt if there is a little left to store away for another meal. Then I'll get the wife here to dress the biggest turkey, and we'll hitch the big grays to the bobs with all the bells we can find, and we'll take a ride out to the old cabin, and you'll agree with me before you get back that you have seen one big surprise party that is worth going to. Then we'll come back here and I think mother will have something good fixed up to fill our stomachs."

"Three cheers for the pumpkin pie!" came from Will.

"And the second best roasted turkey!" came from Mr. Brown.

"Well I guess we'll all be here," said Dean, and they all agreed that that was just the thing to do.

The surprise party with the Jack-o'-lanterns filled to the bursting point with all the good things that go to make up a Thanksgiving dinner set out in the big sled in a jolly mood and after arriving at the old tumble-down shack their hearts swelled with gratitude for the many good things they had at home and for the joy they were privileged to bring to a poor unfortunate family.

First the big sled was discovered by a little girl of about ten years old who was out for a pail of water. As she entered the house she evidently gave notice of the coming party, for immediately half a dozen children some larger and others smaller than herself, were with her on the watch for whatever was going to happen. It was soon learned by Mr. Brown and his crowd of youngsters that the husband and father of the family had been disabled by an accident, and by his being thrown out of work they were all left destitute. And Oh what gratitude and thanksgiving were expressed by all members of the family that in their hour of need the Lord had raised up friends to help them. It was a lovely sight to see the gladness of the little ones and the sunshine that beamed on all the faces of the entire family. In their minds the boys contrasted that scene with some other surprises that are brought about by Hallowe'en players.

They enjoyed the ride back in the crisp air and did justice to the big supper Mrs. Brown had prepared for them. After eating to their fullest capacity, the tables were pushed back and they all indulged in a number of jolly games that Mrs. Brown had planned. After the party was over they all decided it had been the happiest Hallowe'en they had ever known and all went home fully satisfied with the joy they had given and the happiness it had brought them.

The almost complete absence of forest fires with their smoke screens marred scenic effects—the brilliant clearness of the air in this region has made the present tourist season the best on record in British Columbia. Many touring parties travelled over the Canadian Pacific lines some breaking the journey to motor over the picturesque Banff Windermere highway. Among other groups may be mentioned the Alpine Club of Canada, which held its camp at the Lake of the Hanging Glaciers, followed by the Trail Riders of the Canadian Rockies.

Approximately 250 new elevators have been constructed throughout Alberta this year. It is estimated by local grain men. The total capacity of these elevators would be about 18,000,000 bushels, it was stated. Complete figures for elevator construction in the province were not available, but grain men stated that extension of facilities had been progressing rapidly in all parts of Alberta. The capacity of the elevators varied from 35,000 bushels to 140,000 bushels. The Alberta Wheat Pool alone has 110 grain elevator companies have in 1927 and practically all the public grain elevator companies have increased their storage capacity.

When both Mutuals get together and decide to put on a dance it's time to get out the old glad rags and prepare for a good time.
